

Wellington Traffic Consultant Letters (Pg. 1 and Pg. 44-45)  
Traffic Study (Land Use Pg. 2-43 and Master Plan Pg. 46-120)

November 14, 2024

Mr. Damian Newell  
Wellington  
Planning, Zoning & Building Department  
12300 W. Forest Hill Boulevard  
Wellington, FL 33414

**Re: WG 10 Ac Park CPA - #PTC24-001J.1  
2024-0001-CPA**

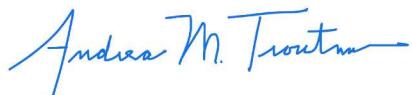

Dear Mr. Newell:

Pinder Troutman Consulting, Inc. (PTC) has completed our review of the Comprehensive Plan/Future Land Use Amendment (FLUA) Application for the above referenced project. The Traffic Impact Analysis completed by MacKenzie Engineering & Planning dated October 16, 2024, was reviewed. It is proposed to change the future land use designations on 10.00 acres from Community Facilities (CF) to High Density (H).

The analysis has demonstrated that the maximum intensity of the proposed land use designation generates less traffic than the maximum intensity of the existing land use designation. With construction of a direct sidewalk connection along Wellington Green Drive to Forest Hill Boulevard (as recommended for the master plan 2024-0001-MP), the proposed FLUA is in compliance with the level of service standards of the Mobility Element of the Village's Comprehensive Plan.

Please contact me by phone or at [atroutman@pindertroutman.com](mailto:atroutman@pindertroutman.com) if you need any additional information or have any questions.

Sincerely,

Andrea M. Troutman, P.E.  
President

## **EXECUTIVE SUMMARY**

A future land use amendment is proposed on 10.00 acres located at 2175 Wellington Green Drive in unincorporated Wellington, Florida (73-41-44-13-01-016-0000). The amendment proposes to change the future land use (FLU) from Community Facility (CF) to High Density (H).

The net change in long-term trip generation for the future land use amendment is as follows:

- -2,101 daily, -377 AM peak hour (-325 in/-52 out), and -149 PM peak hour (-6 in/-143 out) trips.

The net change in short-term trip generation of the future land use amendment is as follows:

- 785 daily, 78 AM peak hour (17 in/61 out), and 37 PM peak hour (20 in/17 out) trips.

The proposed change in future land use has no significant long-term transportation impact within the Village of Wellington. All significantly impact roadways in the short-term are projected to operate acceptably.

## **INTRODUCTION**

A future land use amendment is proposed on 10.00 acres located at 2175 Wellington Green Drive in unincorporated Wellington, Florida (73-41-44-13-01-016-0000). The amendment proposes to change the future land use (FLU) from Community Facility (CF) to High Density (H) as shown in Table 1.

The purpose of this statement is to determine the total traffic volume that will be on each roadway link within the site radius of development influence. This statement will also identify which roadway links (if any) will exceed the adopted Level of Service volume for the subject links addressed within the project's radius of development influence. Figure 1 illustrates the property location.

Table 1. Future Land Use Change Summary

Property Size (Acres)	Existing Maximum FLU				Proposed Maximum FLU			
	Land Use	FAR	Maximum Intensity (SF)	ITE	Land Use	Maximum Density	Maximum Intensity (DUs)	ITE
10.00	Community Facility (CF)	0.35	152,460	730	High Density (H)	22 DU/AC	220	221

The existing property is currently utilized by three (3) soccer fields.

**MacKenzie**  
Engineering & Planning, Inc.

**Figure 1. Property Location Map**

## **FUTURE LAND USE CHANGE ANALYSIS**

### Existing Future Land Use

The existing FLU uses the most intense reasonable maximum development scenario based on the existing land development regulations. This scenario uses Community Facility use at a FAR of 0.35. Therefore, based on the 10.00 acre parcel, the maximum expected intensity with respect to traffic is 152,460 square feet calculated as follows:

Community Facility: 10.00 Acres x 0.35 x 43,560 SF/Acre = 152,460 SF

### Proposed Future Land Use

The proposed FLU for the property is 10.00 acres of High Density. Based on the Wellington Comprehensive Plan, the High Density land use permits 22 homes per acre of land. Therefore, the maximum proposed future land use is 220 single family homes (DUs) calculated as follows:

High Density: 10.00 Acres x 22 DUs per Acre = 220 DUs

## ***TRAFFIC GENERATION***

### ***Rates and equations***

The study uses trip generation rates for Multi-Family Mid-Rise Housing (ITE Land Use 221), Government Office (ITE Land Use 730) and Soccer Complex (ITE Land Use 488) published in Palm Beach County Trip Generation Rates and the Institute of Transportation Engineer (ITE)'s report, *Trip Generation (11th Edition)*.

### ***Trip Generation – Long Term***

#### ***Existing Use***

- 152,460 SF of Government Office (ITE Land Use 730)

The existing use generates the following net external trips:

- 3,100 daily, 458 AM peak hour (344 in/114 out), and 235 PM peak hour (58 in/177 out) trips.

#### ***Proposed Future Land Use***

- 220 Multi-Family Mid-Rise Housing DUs (ITE Land Use 221)

The proposed FLU is expected to generate the following net proposed trips:

- 999 daily, 81 AM peak hour (19 in/62 out), and 86 PM peak hour (52 in/34 out) trips.

#### ***Net Impact***

The difference between the maximum trip generation potential of the existing future land use and the proposed future land use was examined to determine the maximum (worst case/conservative) impact to the existing and future roadway network. Table 2A displays the resulting trip generation.

- -2,101 daily, -377 AM peak hour (-325 in/-52 out), and -149 PM peak hour (-6 in/-143 out) trips.

#### ***Internal Capture***

This site contains no internal capture traffic.

### ***Pass-by Trip Capture***

The proposed pass-by capture is in accordance with the Palm Beach County pass-by rates for the respective uses.

Table 2A. Trip Generation – Long Term Analysis

Land Use	Intensity	Daily Trips	AM Peak Hour			PM Peak Hour		
			Total	In	Out	Total	In	Out
<b><u>Existing Use Traffic</u></b>								
Government Office	152.460 1000 SF	3,444	509	382	127	261	65	196

### **Trip Generation – Short Term**

#### ***Existing Use***

- 3 Fields of Soccer Complex (ITE Land Use 488)

The existing use generates the following net external trips:

- 214 daily, 3 AM peak hour (2 in/1 out), and 49 PM peak hour (32 in/17 out) trips.

#### ***Proposed Future Land Use***

- 220 Multi-Family Mid-Rise Housing DUs (ITE Land Use 221)

The proposed FLU is expected to generate the following net proposed trips:

- 999 daily, 81 AM peak hour (19 in/62 out), and 86 PM peak hour (52 in/34 out) trips.

### ***Net Impact***

The difference between the maximum trip generation potential of the existing future land use and the proposed future land use was examined to determine the maximum (worst case/conservative) impact to the existing and future roadway network. Table 2B displays the resulting trip generation.

- 785 daily, 78 AM peak hour (17 in/61 out), and 37 PM peak hour (20 in/17 out) trips.

### ***Internal Capture***

This site contains no internal capture traffic.

### ***Pass-by Trip Capture***

The proposed pass-by capture is 0.

## **TRAFFIC DISTRIBUTION AND ASSIGNMENT**

Traffic distribution and assignment was determined using engineering judgment, trip lengths based on the uses and from a review of the roadway network. The property traffic assignment is shown in Figure 2. The overall distribution is summarized by general directions and is depicted below:

EAST	-	60 percent
WEST	-	40 percent

**Figure 2. Traffic Assignment**

## **ASSURED AND PROGRAMMED CONSTRUCTION**

A review conducted of the Five-Year Plans of Palm Beach County and FDOT, as well as those improvements committed by the developers of projects in the area. No improvements are identified in the plans to add capacity within the study area.

### **GROWTH RATE**

According to the requirements of the TPS Article 12 Chapter C.1.C.4.b., the existing traffic volumes were adjusted using factors determined by a review of the historic traffic count data published by FDOT. The study uses a 2.0 percent growth rate as shown in Table 3.

Table 3. Growth Rate Calculation

Road Name	Count Station	Segment	2018 AADT	2019 AADT	2020 AADT	2021 AADT	2022 AADT	Annual Absolute Growth	Growth Rate
Forest Hill Blvd	93-7087	Wellington Trc to South Shore Blvd	30,258	-	-	-	28,664	-399	-1.39%
	93-3407	South Shore Blvd to SR 7	49,836	-	-	-	53,987	1,038	1.92%
	93-0060	SR 7 to E of SR 7/441	38,500	39,500	-	-	38,500	-77	-0.20%

	93-0037	S of SR 80/Southern Blvd	63,500	65,500	-	-	67,500	923	1.37%
Stribling Wy	93-7480	Pierson Rd to Forest Hill Blvd	13,259	-	-	-	13,303	11	0.08%
Pierson Rd	93-7525	S Shore Blvd to Stribling Way	4,743	-	-	-	4,238	-126	-2.98%
								Weighted Average Growth Rate Used	1.10% 2.00%

### **LONG TERM ANALYSIS (2045)**

The net daily and peak hour impact of the change is less than 0 peak hour trips as a result of the proposed land use amendment from Community Facility to High Density. The proposed FLU amendment has no impact upon transportation infrastructure. Therefore, Long-Term Analysis is not necessary.

## **SHORT TERM ANALYSIS (2029)**

According to the City's Land Development Regulations Section 9.4.2 B, Part II requires analysis of Wellington roadways where a project's traffic is significant. The total traffic in the peak hour on the link shall be compared to applicable thresholds in 9.4.2-D (LOS E Link Service Volumes) for Link Service Volumes and Peak Hour Directional Volume thresholds. Significant links are road segments impacted by project traffic that equal or exceed one percent of a roadway's service volume.

### ***Test for LOS E Link Service Volumes***

The project significantly impacts Forest Hill Boulevard from Olive Drive to State Road 7 in the AM peak hour as shown in Exhibit 2A. Therefore, the study analyzed Forest Hill Boulevard. The applied growth rate on the roads in the radius of development impact used the greater of one percent growth rate plus committed traffic or the historical growth.

The project related traffic and total traffic for the AM peak hour for one-way peak hour conditions in 2029 are shown in Exhibit 2B. The Peak Hour is projected to operate acceptably. Therefore, short-term analysis is acceptable.

## CONCLUSION

A future land use amendment is proposed on 10.00 acres located at 2175 Wellington Green Drive in unincorporated Wellington, Florida (73-41-44-13-01-016-0000). The amendment proposes to change the future land use (FLU) from Community Facility (CF) to High Density (H).

The net change in long-term trip generation for the future land use amendment is as follows:

- -2,101 daily, -377 AM peak hour (-325 in/-52 out), and -149 PM peak hour (-6 in/-143 out) trips.

The net change in short-term trip generation of the future land use amendment is as follows:

- 785 daily, 78 AM peak hour (17 in/61 out), and 37 PM peak hour (20 in/17 out) trips.

The proposed change in future land use has no significant long-term transportation impact within the Village of Wellington. All significantly impacted roadways in the short-term are projected to operate acceptably.

a) Based on Daily to AM peak ratio for LUC 532 (Private School (K-12)

b) Weekend peak hour rate = 10.36 per 1,000 s.f. with a 48/52 directional split

c) Landscape Services acreage consists of overnight vehicle and equipment storage as well as areas (covered or uncovered) for chemicals, fertilizers, landscape materials (excluding plants) and other items needed for day-to-day operations. Not included are drive aisles, customer/employee parking, structures shared by nursery and landscape services, facilities that solely serve the onsite landscape activities or any nursery growing areas.

d) Based on Daily to PM ratio for ITE Code 937 (Coffee Donut Shop + DT)

e) FP=Fueling Position. Use both FP and Convenience Store size in estimating trips using the provided equation. Note that no internalization between the gas pumps and convenience store, as per ULDC Article 12, should be applied to estimate the net trips.

f) Use PM rates

g) Daily rate taken from PBC trip gen. study. Peak hour rates derived by applying peak to daily ratios for gas station to daily carwash rate from older ITE TGM. New PBC rate study underway.

h) Based on PBC analysis of ITE TGM data plots

### Modification History

3/2/2020: Added Landscape Services, modification history, edited formatting

7/25/2022: Updated with ITE TG Manual 11th ed information

# Land Use: 488 Soccer Complex

---

## Description

A soccer complex is an outdoor facility that is used for non-professional soccer games. It may consist of multiple fields. The size of each field within the land use may vary to accommodate games for different age groups. On-site amenities may include stadium seating, a fitness trail, an activities shelter, aquatic center, picnic grounds, basketball and tennis courts, and a playground. Public park (Land Use 411) is a related use.

## Additional Data

***Caution should be used when applying these data. Peaking at soccer complexes typically occurred in time periods shorter than 1 hour. These peaking periods may have durations of 10 to 15 minutes. To assist in the future analysis of this land use, it is important to collect driveway counts in 10-minute intervals.***

The technical appendices provide supporting information on time-of-day distributions for this land use. The appendices can be accessed through either the ITETripGen web app or the trip generation resource page on the ITE website (<https://www.ite.org/technical-resources/topics/trip-and-parking-generation/>).

The sites were surveyed in the 1990s and the 2010s in California, Colorado, Hawaii, Indiana, New Jersey, and Washington.

Table 9.4.2-C: LOS D Link Service Volumes

Facility Type		ADT		Peak Hour Directional	
		Class I	Class II	Class I	Class II
2 lanes undivided <sup>(1)</sup>	2L	17,700	14,800	880	750
2 lanes divided	2LD	18,600	15,500	920	790
4 lanes undivided <sup>(1)</sup>	4L	37,800	30,800	1,900	1,550
4 lanes divided	4LD	39,800	32,400	2,000	1,630
5 lanes two-way	5L	39,800	32,400	2,000	1,630
6 lanes divided	6LD	59,900	50,000	3,020	2,520
8 lanes divided	8LD	80,100	67,300	4,040	3,390

Notes:

Based on the 2012 FDOT Quality/LOS Handbook.

Class I - Roadways with 40 mph or higher posted speed limits.

Class II - Roadways with 35 mph or lower posted speed limits.

If heavy vehicle percentages for a facility are greater than 10 percent as determined by the Wellington Engineer then service volumes may be subject to a corresponding reduction. <sup>(1)</sup>

Service volumes for undivided roadways assume exclusive left turn lanes are provided at signalized intersections. If there are no left turn lanes reduce these values by 20 percent.

Table 9.4.2-D: LOS E Link Service Volumes

Facility Type		ADT		Peak Hour Directional	
		Class I	Class II	Class I	Class II
2 lanes undivided <sup>(1)</sup>	2L	17,700	15,600	880	800
2 lanes divided	2LD	18,600	16,400	920	840
4 lanes undivided <sup>(1)</sup>	4L	37,800	32,100	1,900	1,610
4 lanes divided	4LD	39,800	33,800	2,000	1,700
5 lanes two-way	5L	39,800	33,800	2,000	1,700
6 lanes divided	6LD	59,900	50,900	3,020	2560
8 lanes divided	8LD	80,100	68,100	4,040	3,420

Notes:

Based on the 2012 FDOT Quality/LOS Handbook.

Class I - Roadways with 40 mph or higher posted speed limits.

Class II - Roadways with 35 mph or lower posted speed limits.

If heavy vehicle percentages for facility are greater than 10 percent as determined by the Wellington Engineer then service volumes may be subject to a corresponding reduction. <sup>(1)</sup> Service volumes for undivided roadways assume exclusive left turn lanes are provided at signalized intersections. If there are no left turn lanes reduce these values by 20 percent.

Table 9.4.2-E: LOS D Speed Thresholds

Urban Street Class	I	II	III
Range of Free Flow Speeds (FFS)	55 to 45 miles per hour	45 to 35 miles per hour	35 to 30 miles per hour
Typical FFS	50 miles per hour	40 miles per hour	35 miles per hour

## Property Detail

Location Address : 2175 WELLINGTON GREEN DR  
 Municipality : WELLINGTON  
 Parcel Control Number : 73-41-44-13-01-016-0000  
 Subdivision : WELLINGTON GREEN  
 Official Records Book/Page : 12830 / 751  
 Sale Date : JUL-2001  
 Legal Description : WELLINGTON GREEN PARK TR

## Owner Information

**Owner(s)**  
 WELLINGTON VILLAGE OF

**Mailing Address**  
 12300 FOREST HILL BLVD

**Note:**

\*Residential Density bonus is planned unit development maximum density and may be limited by the Land Development Regulations or Wellington's Council.

\*\*Reinvestment bonus density is in addition to the PUD maximum density and may be limited by the Land Development Regulations or Wellington's Council.

All parcels with previously issued development orders shall be governed by the specific densities within the respective development orders.

**Policy LU&CD 1.6.4**

**Archaeological Resources Protection**

Enforce the Archaeological Resources Protection regulations of the Land Development Regulations that establishes the designation, protection, and procedures of the potential local archaeological sites.

**Objective LU&CD 1.7**

**Community Facilities Land Use**

Provide a full range of local or regional community-based uses primarily intended to serve the public by appropriately applying the Community Facilities land use designation.

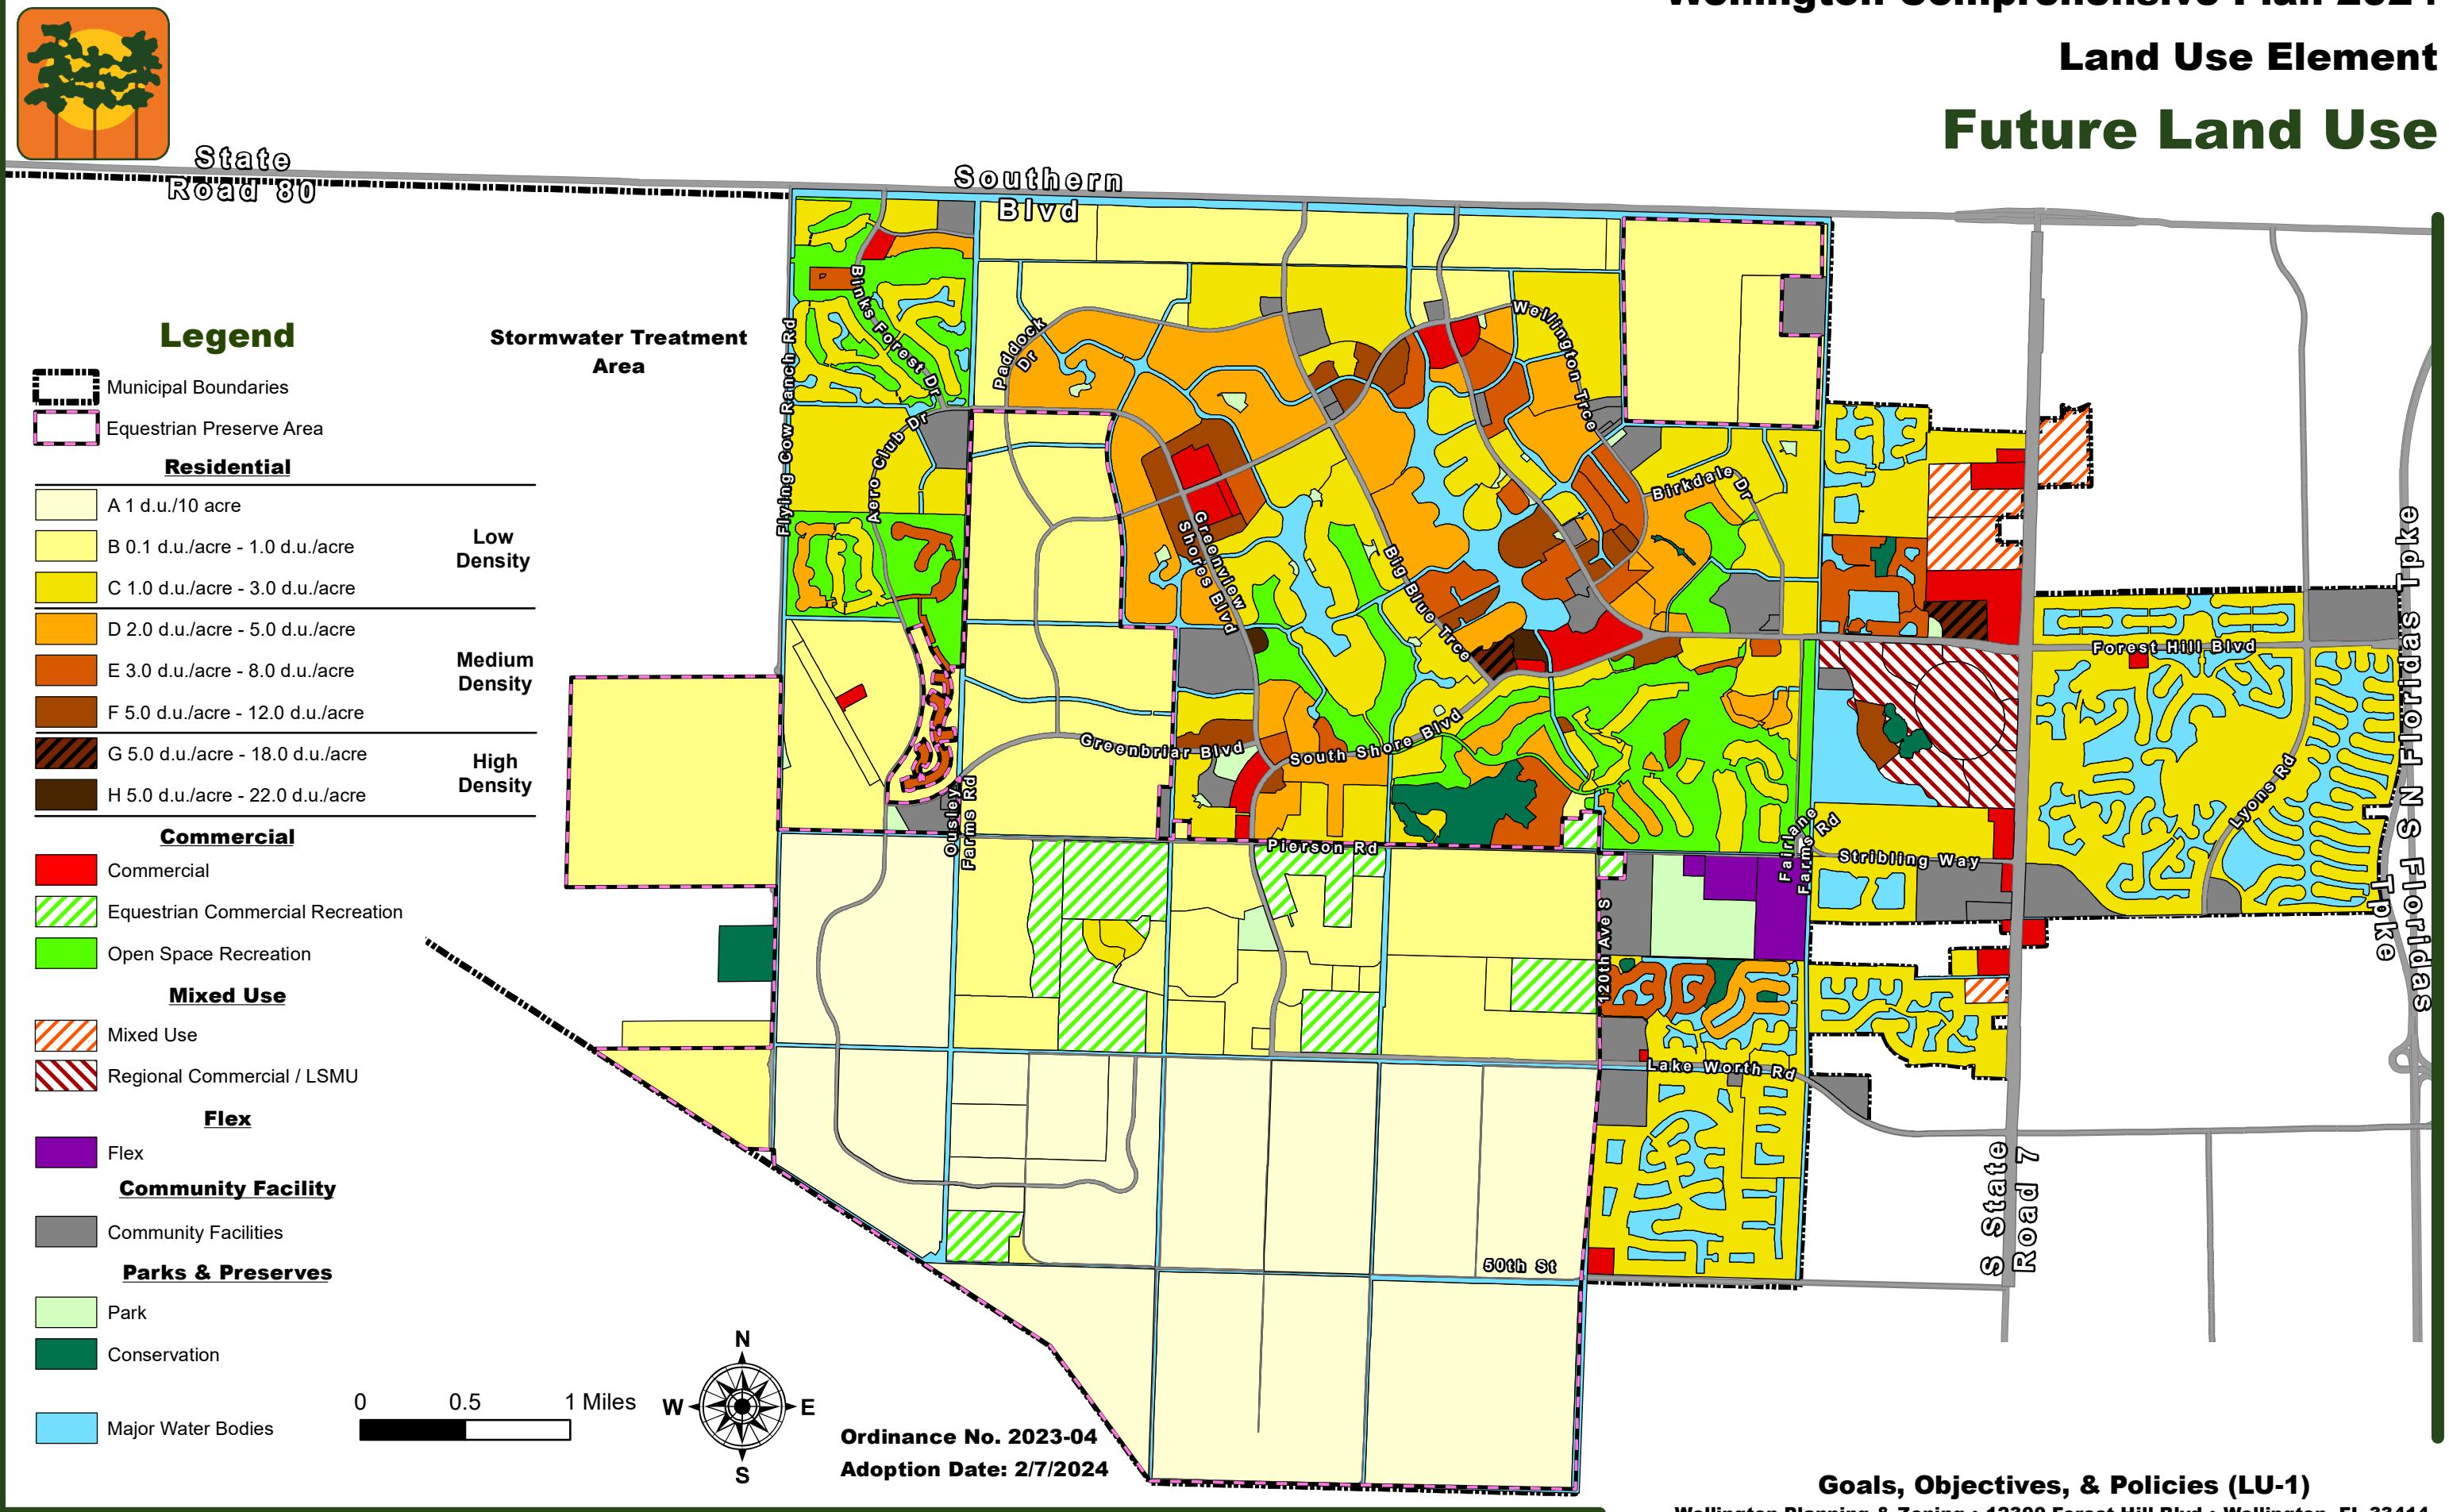

**Policy LU&CD 1.7.1**

**Community Facilities Land Use**

The Community Facilities (CF) land use designation permits a full range of community uses such as educational, child and adult care facilities, medical and accessory offices, governmental, religious, cemetery, civic, cultural, communications, public works, utility, and related uses. The maximum FAR is 0.35.

November 14, 2024

Mr. Damian Newell  
Wellington  
Planning, Zoning & Building Department  
12300 W. Forest Hill Boulevard  
Wellington, FL 33414

**Re:     WG 10 Ac Park MP - #PTC24-001J.3  
2024-0001-MP**

Dear Mr. Newell:

Pinder Troutman Consulting, Inc. (PTC) has completed our review of the Master Plan Application for the above referenced project. The Traffic Impact Analysis completed by MacKenzie Engineering & Planning dated October 16, 2024, was reviewed. The resubmittal addressed our comments. We have no new comments.

The project is summarized below:

**Existing Uses:**     3 Soccer Fields  
**Proposed Uses:**    220 Multi-Family Residential Units

**Net Daily Trips:**    785  
**Net Peak Hour Trips:** AM: 17 In, 61 Out, 78 Total  
                            PM: 20 In, 17 Out, 37 Total

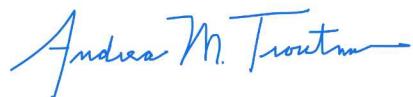

It has been demonstrated that the proposed development meets the Traffic Performance Standards of Wellington and Palm Beach County. We recommend the following conditions of approval.

1. No building permits are to be issued after December 31, 2029, unless a time extension has been approved.
2. The County traffic concurrency approval is subject to the Project Aggregation Rules as set forth in the Traffic Performance Standards Ordinance.
3. The Property Owner shall construct the pedestrian improvements as shown on the site plan.

4. A direct sidewalk connection from the site to Forest Hill Boulevard shall be provided along Wellington Green Drive. Posting of surety for this sidewalk shall be provided to Wellington prior to first building permit. The surety shall only be released upon construction of the sidewalk or completion of a civil engineering feasibility study that is accepted by the Village Engineer which demonstrates that the sidewalk cannot be built.

Please contact me by phone or at [atroutman@pindertrotman.com](mailto:atroutman@pindertrotman.com) if you need any additional information or have any questions.

Sincerely,

Andrea M. Troutman, P.E.  
President

## **EXECUTIVE SUMMARY**

MacKenzie Engineering and Planning, Inc. performed an analysis of the traffic impacts resulting from the proposed Wellington. The project is located at 2175 Wellington Green Drive in unincorporated Wellington, Florida (73-41-44-13-01-016-0000). The existing use includes 3 Fields soccer complex. The project proposes 220 multi-family DUs. A buildout year of 2029 was analyzed for the proposed project.

The proposed project is expected to generate the following net new external trips:

- 785 daily, 78 AM peak hour (17 in/61 out), and 37 PM peak hour (20 in/17 out) trips.

The proposed project is expected to generate the following net new external and cumulative driveway trips:

- 999 daily, 81 AM peak hour (19 in/62 out), and 86 PM peak hour (52 in/34 out) trips.

This traffic impact analysis shows that the proposed project will meet the Village of Wellington's Land Development Regulations (i.e. Part I and Part II). No improvements are recommended.

## **INTRODUCTION**

MacKenzie Engineering & Planning, Inc. was retained to prepare a traffic impact analysis for Wellington. This document presents the methodology used and the findings of the traffic impact analysis. The analysis was conducted in accordance with the requirements of the Countywide Traffic Performance Standards of Palm Beach County.

The project is located at 2175 Wellington Green Drive in unincorporated Wellington, Florida (73-41-44-13-01-016-0000). A buildout year of 2029 was analyzed for the proposed project. The existing use includes 3 Fields soccer complex. The project proposes 220 multi-family DUs. Figure 1 illustrates the site location.

**Figure 1. Site Location Map**

## **INVENTORY AND PLANNING DATA**

The traffic data used in this analysis were obtained from Palm Beach County and MEP. Palm Beach County provided committed trip information. The data included:

- Roadway Geometrics
- Intersection Turning Movement Counts

## **PROJECT TRAFFIC**

### Traffic Generation

The study uses Palm Beach County trip generation rates and equations for Multi-Family Mid-Rise Housing (ITE Land Use 221). The daily and peak hour traffic generation for Soccer Complex (ITE Land Use 488) used the trip generation rates published by the Institute of Transportation Engineers (ITE)'s report. Table 1 presents the project's trip generation.

### ***Existing Use***

- 3 Fields of Soccer Complex (ITE Land Use 488)

The existing site is expected to generate the following net new external and cumulative driveway trips:

- 214 daily, 3 AM peak hour (2 in/1 out), and 49 PM peak hour (32 in/17 out) trips.

### ***Proposed Use***

- 220 Multi-Family Mid-Rise Housing (ITE Land Use 221)

The proposed project is expected to generate the following net new external and cumulative driveway trips:

- 999 daily, 81 AM peak hour (19 in/62 out), and 86 PM peak hour (52 in/34 out) trips.

### ***Net Change***

The resulting net external trips change is:

- 785 daily, 78 AM peak hour (17 in/61 out), and 37 PM peak hour (20 in/17 out) trips.

### ***Pass-by Trip & Internal Capture***

The pass-by and internal capture is 0.

Table 1. Trip Generation

Land Use	Intensity	Daily Trips	AM Peak Hour			PM Peak Hour		
			Total	In	Out	Total	In	Out
<b>Existing Site Traffic</b>								
Soccer Complex	3 Fields	214	3	2	1	49	32	17
<b>Proposed Site Traffic</b>								
Multifamily Mid-Rise Housing 4-10 story	220 DU	999	81	19	62	86	52	34
<b>NET CHANGE IN TRIPS (FOR THE PURPOSES OF TEST 2)</b>			<b>785</b>	<b>78</b>	<b>17</b>	<b>61</b>	<b>37</b>	<b>20</b>
<b>NET CHANGE IN DRIVEWAY VOLUMES</b>			<b>785</b>	<b>78</b>	<b>17</b>	<b>61</b>	<b>37</b>	<b>20</b>
Note: Trip generation was calculated using the following data:								

Land Use	ITE Code	Unit	Daily Rate	Pass-by Rate	AM Peak Hour		PM Peak Hour	
					in/out	Rate	in/out	Equation
Multifamily Mid-Rise Housing 4-10 story	221	DU	4.54	0%	23/77	0.37	61/39	0.39
Soccer Complex	488	Fields	71.33	0%	61/39	0.99	66/34	16.43

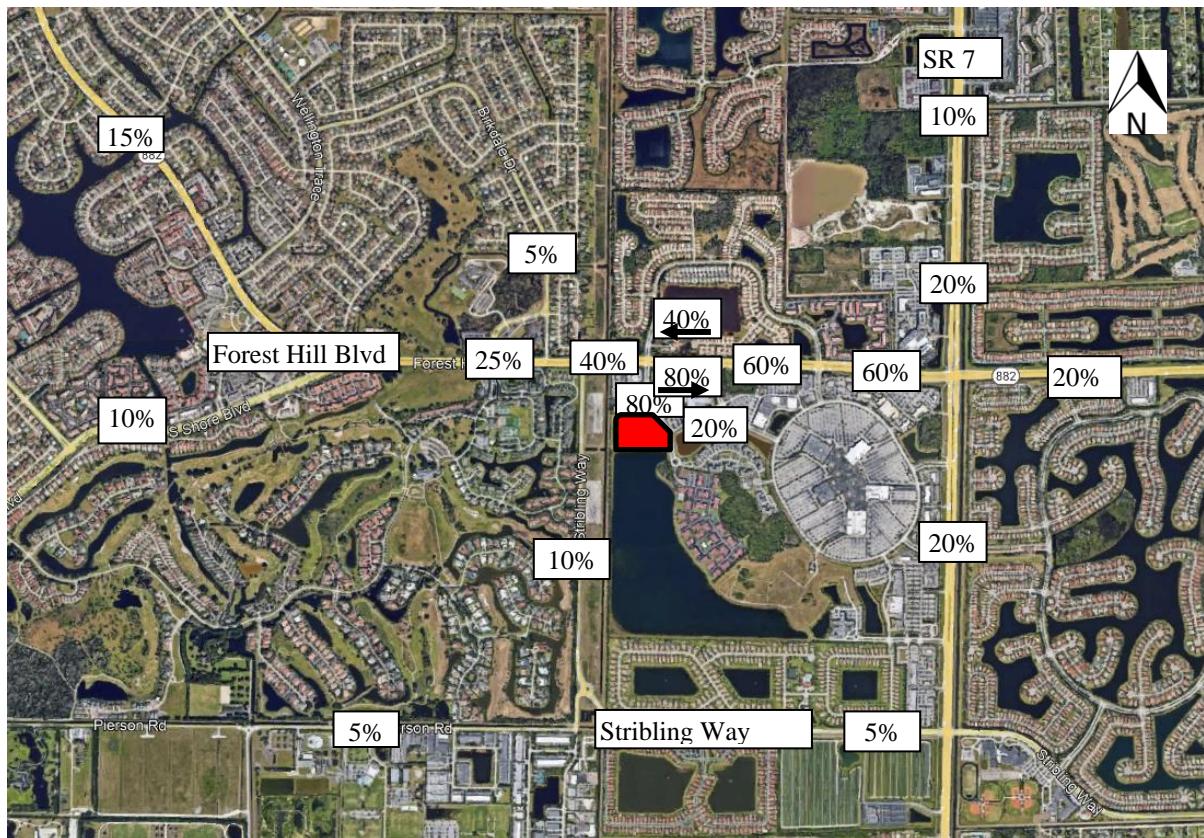

Copyright © 2024, MacKenzie Engineering and Planning, Inc.

## **TRAFFIC DISTRIBUTION**

Traffic distribution and assignment was determined using engineering judgment, trip lengths based on the uses and from a review of the roadway network. The overall distribution is summarized by general directions and is depicted below:

EAST	-	60 percent
WEST	-	40 percent

**Figure 2. Traffic Assignment**

## **ASSURED AND PROGRAMMED CONSTRUCTION**

A review conducted of the Five-Year Plans of Palm Beach County and FDOT, as well as those improvements committed by the developers of projects in the area. No improvements are identified in the plans to add capacity within the study area.

## **COMMITTED PROJECTS**

The Palm Beach County Traffic Division has developed a database containing anticipated traffic volumes associated with committed development projects in the area. These volumes were obtained, and their impacts were added to the roadway links and intersections within the study area.

## **GROWTH**

In order to provide an accurate traffic analysis, the growth rate at each intersection was determined by a volume weighted averaging of the growth on each leg of the intersection as shown in Table 2.

Table 2. Growth Rate Calculation

Road Name	Count Station	Segment	2018 AADT	2019 AADT	2020 AADT	2021 AADT	2022 AADT	Annual Absolute Growth	Growth Rate
Forest Hill Blvd	93-7087	Wellington Trc to South Shore Blvd	30,258	-	-	-	28,664	-399	-1.39%
	93-3407	South Shore Blvd to SR 7	49,836	-	-	-	53,987	1,038	1.92%
	93-0060	SR 7 to E of SR 7/441	38,500	39,500	-	-	38,500	-77	-0.20%
SR 7	93-0721	S of Foresthill Blvd	51,500	61,000	-	-	60,000	1,558	2.60%
	93-0037	S of SR 80/Southern Blvd	63,500	65,500	-	-	67,500	923	1.37%
Stribling Wy	93-7480	Pierson Rd to Forest Hill Blvd	13,259	-	-	-	13,303	11	0.08%
Pierson Rd	93-7525	S Shore Blvd to Stribling Way	4,743	-	-	-	4,238	-126	-2.98%
								Weighted Average	1.10%
								Growth Rate Used	2.00%

## **PART II (INTERSECTION ANALYSIS)**

According to the City's Land Development Regulations Section 9.4.2 A, Part I requires an analysis of the major intersection(s) nearest to each link that is directly assessed and significantly impacted by the proposed project. In addition, it is also required that an analysis be performed on all intersections where the project traffic is equal to or greater than 10 percent of the total traffic on at least one of the intersection approaches. All Wellington intersections where links are operating at 80 percent or greater of LOS D and where the project has a significant impact on any approach require intersection analysis.

### **Intersections with Ten Percent Project Traffic on Approach**

Based on the project trip generation at the end of buildout phase, there are no intersections where the project traffic was equal to or greater than 10 percent on at least one of the intersection approaches.

### **Intersections with 80 Percent V/C Ratio Traffic on Approach**

Based on the project trip generation at the end of buildout phase, there are no intersections where the links are operating at 80 percent or greater of LOS D on the intersection approaches.

Part I is satisfied. No intersection needs to be analyzed.

## **PART II (LINK EVALUATION)**

### **Test for LOS D Link Service Volumes**

According to the City's Land Development Regulations Section 9.4.2 B, Part II requires analysis of Wellington roadways where a project's traffic is significant. The total traffic in the peak hour on the link shall be compared to applicable thresholds in Table 9.4.2-C (LOS D Link Service Volumes) for Link Service Volumes and Peak Hour Directional Volume thresholds. Significant links are road segments impacted by project traffic that equal or exceed one percent of a roadway's service volume.

The project has two direct access on Wellington Green Drive. The project significantly impacts Forest Hill Boulevard from Wellington Green Drive to State Road 7 in the AM peak hour as shown in Exhibit 2A. Therefore, the study analyzed Forest Hill Boulevard. The applied growth rate on the roads in the radius of development impact used the greater of one percent growth rate plus committed traffic or the historical growth.

The project related traffic and total traffic for the AM peak hours for one-way peak hour conditions in 2029 are shown in Exhibit 2B. The Peak Hour is projected to operate acceptably.

### *Test for LOS E Link Service Volumes*

According to the City's Land Development Regulations Section 9.4.2 B, Part II requires analysis of Wellington roadways where a project's traffic is significant. The total traffic in the peak hour on the link shall be compared to applicable thresholds in 9.4.2-D (LOS E Link Service Volumes) for Link Service Volumes and Peak Hour Directional Volume thresholds. Significant links are road segments impacted by project traffic that equal or exceed three percent of a roadway's service volume.

The project has two direct access on Wellington Green Drive. A Test 2 one-way peak hour link performance standard evaluation was undertaken for all thoroughfare links within the project study area. Based on the analysis, none of the Test Two roadway links are significantly impacted by the project as shown in Exhibit 3.

Part II is satisfied.

## ***INTERSECTION***

### ***Intersection Analysis***

The intersections within the study area were evaluated in 2029 total (existing traffic plus background plus project) traffic conditions. This study analyzes the impacts to the following intersections for the AM and PM peak hours:

- Forest Hill Boulevard & Wellington Green Drive
- Forest Hill Boulevard & Olive Drive

Data from the existing facilities within the study area were collected based on aerial photography and site observations. MacKenzie Engineering and Planning, Inc. collected AM and PM peak hour turning movement counts on April 25, 2024. The counts were adjusted to peak season conditions using FDOT's peak season adjustment factors.

#### ***Forest Hill Boulevard & Wellington Green Drive***

MEP evaluated the Forest Hill Boulevard & Wellington Green Drive intersection using HCS 2024. MEP obtained the 95th percentile queue from HCS 2024 for each turn-lane at the intersection and compared it to the existing turn-lane lane storage. The intersection is projected to operate acceptably as shown in Table 3A and Table 3B.

Table 3A. Forest Hill Boulevard & Wellington Green Drive Intersection Analysis Results –

AM

Description	2029 Pre-Development	2029 Post-Development			Acceptable?
	V/C Ratio	95th Queue Length (ft)	Existing Storage Length (ft)	V/C Ratio	
WBL	0.07	25	310	0.08	YES
NBR	0.25	50	-	0.36	YES
Delay (s/veh)	15.4	17.2			YES
LOS	C	C			YES

Table 3B. Forest Hill Boulevard & Wellington Green Drive Intersection Analysis Results –

PM

Description	2029 Pre-Development	2029 Post-Development			Acceptable?
	V/C Ratio	95th Queue Length (ft)	Existing Storage Length (ft)	V/C Ratio	
WBL	0.24	25	310	0.25	YES
NBR	0.24	50	-	0.27	YES
Delay (s/veh)	15.2	15.7			YES
LOS	C	C			YES

### **Forest Hill Boulevard & Olive Drive**

MEP evaluated the Forest Hill Boulevard & Olive Drive intersection using HCS 2024. MEP obtained the 95th percentile queue from HCS 2024 for each turn-lane at the intersection and compared it to the existing turn-lane lane storage. The intersection is projected to operate acceptably as shown in Table 4A and Table 4B.

Table 4A. Forest Hill Boulevard & Olive Drive Intersection Analysis Results – AM

Description	2029 Pre-Development	2029 Post-Development			Acceptable?
	V/C Ratio	95th Queue Length (ft)	Existing Storage Length (ft)	V/C Ratio	
WBL	0.630	75	440	0.638	YES
NBL	0.768	150	-	0.767	YES
NBR	0.262	100	-	0.352	YES
Delay (s/veh)	10.8	11.9			YES
LOS	B	B			YES

Table 4B. Forest Hill Boulevard & Olive Drive Intersection Analysis Results – PM

Description	2029 Pre-Development	2029 Post-Development			Acceptable?
	V/C Ratio	95th Queue Length (ft)	Existing Storage Length (ft)	V/C Ratio	
WBL	0.728	125	440	0.737	YES
NBL	0.835	350	-	0.893	YES
NBR	0.387	200	-	0.416	YES
Delay (s/veh)	21.0	21.3			YES
LOS	C	C			YES

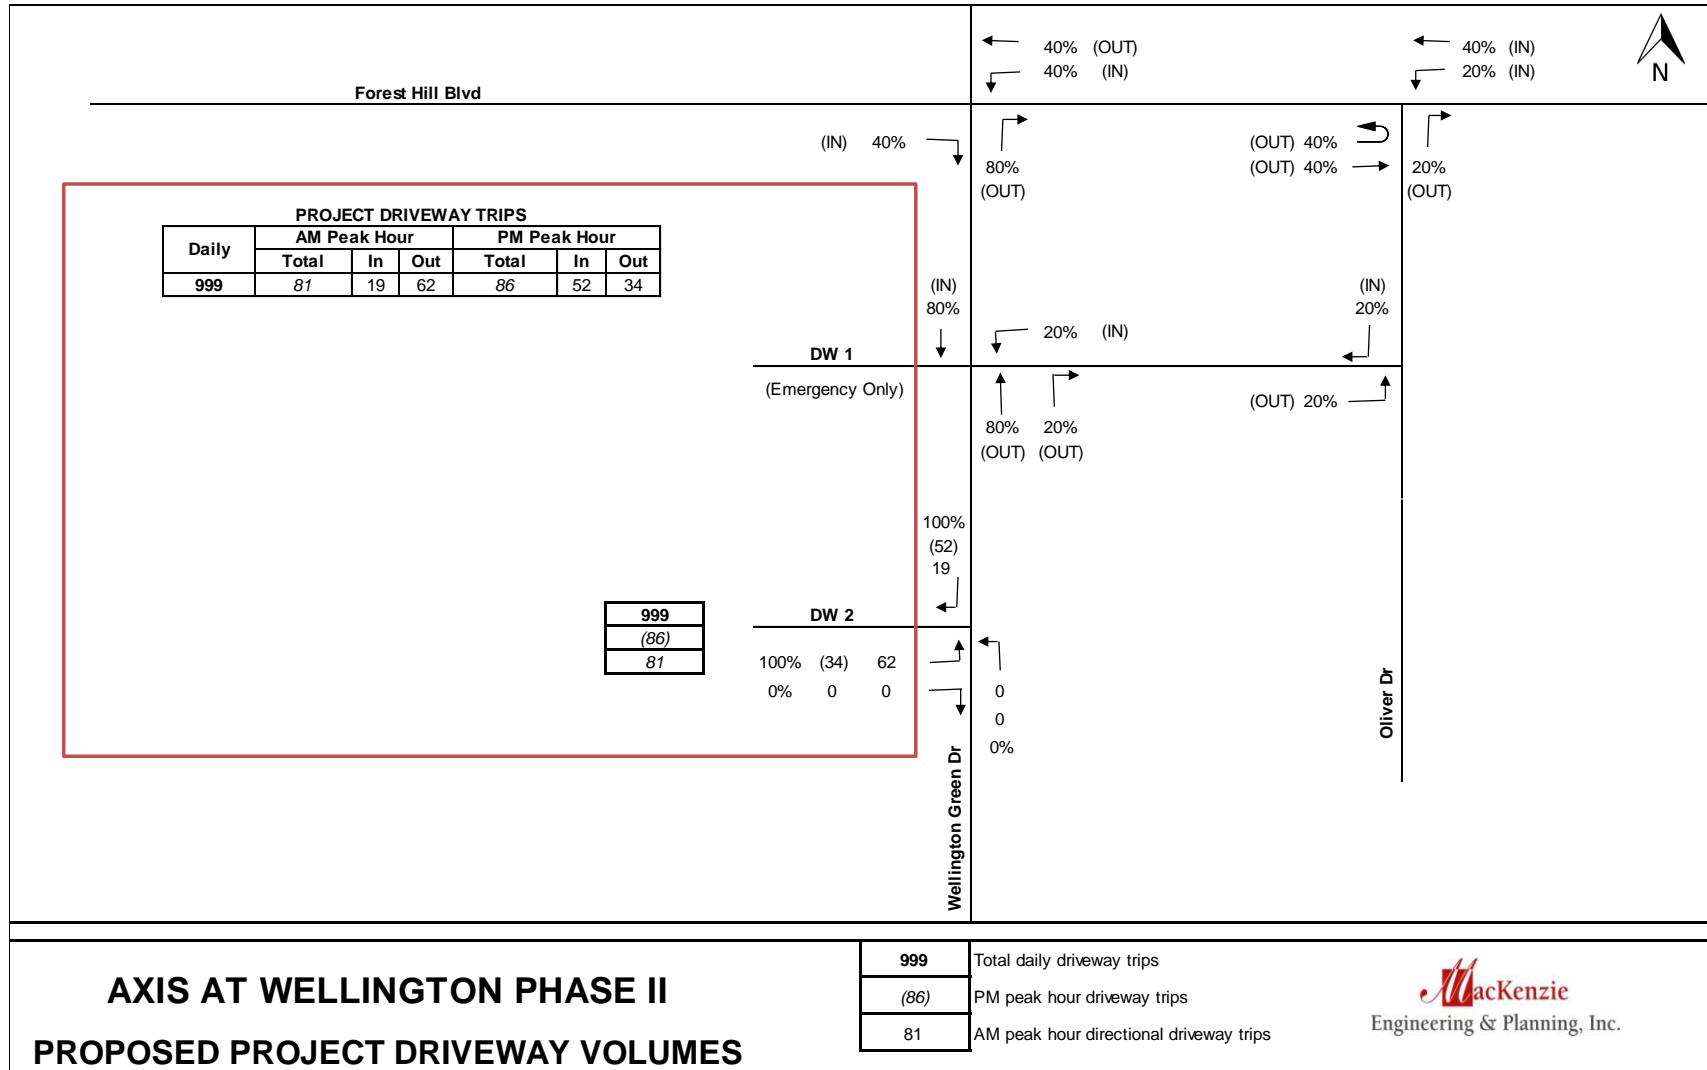

## **DRIVEWAYS**

The applicant has one existing access and one proposed access. The accesses are as follows:

- Wellington Green Drive & DW 1 (North) – Emergency Access Only – Proposed
- Wellington Green Drive & DW 2 (South) – Full opening – Existing

Figures 3 illustrates the driveway volumes.

**Figure 3. Driveway Volumes**

## Driveway Turn Lane Analysis

### **Wellington Green Drive & DW 1 (North)**

Driveway 1 is emergency access only. Therefore, no turn lanes are needed.

### **Wellington Green Drive & DW 2 (South)**

#### Ingress Right Turn Lane

A right-turn lane at this location is not required because the projected right-turn volume of 52 vehicles does not satisfy criteria identified within PBC Code 300 Driveways and Other Turnouts Section 6B.

PBC Code 300 Driveways and Other Turnouts Section 6B. Requirements for a right-turn lane:

- a) The adjacent street roadway AADT exceeds 10,000; and (Not meet)
- b) Driveway volume exceeds 1,000 vehicles per day (999); and (Not meet)
- c) Right turn ingress volumes exceed 75 vehicles per hour per peak hour (52). (Not meet)

Therefore, a right-turn lane into the site is not required or needed.

#### Ingress Left Turn Lane

There are no ingress left-turn movement volumes. Therefore, a left-turn lane into the site is not required or needed.

## **CONCLUSION**

MacKenzie Engineering and Planning, Inc. performed an analysis of the traffic impacts resulting from the proposed Wellington. The project is located at 2175 Wellington Green Drive in unincorporated Wellington, Florida (73-41-44-13-01-016-0000). The existing use includes 3 Fields soccer complex. The project proposes 220 multi-family DUs. A buildout year of 2029 was analyzed for the proposed project.

The proposed project is expected to generate the following net new external trips:

- 785 daily, 78 AM peak hour (17 in/61 out), and 37 PM peak hour (20 in/17 out) trips.

The proposed project is expected to generate the following net new external and cumulative driveway trips:

- 999 daily, 81 AM peak hour (19 in/62 out), and 86 PM peak hour (52 in/34 out) trips.

This traffic impact analysis shows that the proposed project will meet the Village of Wellington's Land Development Regulations (i.e. Part I and Part II). No improvements are recommended.

a) Based on Daily to AM peak ratio for LUC 532 (Private School (K-12)

b) Weekend peak hour rate = 10.36 per 1,000 s.f. with a 48/52 directional split

c) Landscape Services acreage consists of overnight vehicle and equipment storage as well as areas (covered or uncovered) for chemicals, fertilizers, landscape materials (excluding plants) and other items needed for day-to-day operations. Not included are drive aisles, customer/employee parking, structures shared by nursery and landscape services, facilities that solely serve the onsite landscape activities or any nursery growing areas.

d) Based on Daily to PM ratio for ITE Code 937 (Coffee Donut Shop + DT)

e) FP=Fueling Position. Use both FP and Convenience Store size in estimating trips using the provided equation. Note that no internalization between the gas pumps and convenience store, as per ULDC Article 12, should be applied to estimate the net trips.

f) Use PM rates

g) Daily rate taken from PBC trip gen. study. Peak hour rates derived by applying peak to daily ratios for gas station to daily carwash rate from older ITE TGM. New PBC rate study underway.

h) Based on PBC analysis of ITE TGM data plots

### Modification History

3/2/2020: Added Landscape Services, modification history, edited formatting

7/25/2022: Updated with ITE TG Manual 11th ed information

# Land Use: 488 Soccer Complex

---

## Description

A soccer complex is an outdoor facility that is used for non-professional soccer games. It may consist of multiple fields. The size of each field within the land use may vary to accommodate games for different age groups. On-site amenities may include stadium seating, a fitness trail, an activities shelter, aquatic center, picnic grounds, basketball and tennis courts, and a playground. Public park (Land Use 411) is a related use.

## Additional Data

*Caution should be used when applying these data. Peaking at soccer complexes typically occurred in time periods shorter than 1 hour. These peaking periods may have durations of 10 to 15 minutes. To assist in the future analysis of this land use, it is important to collect driveway counts in 10-minute intervals.*

The technical appendices provide supporting information on time-of-day distributions for this land use. The appendices can be accessed through either the ITETripGen web app or the trip generation resource page on the ITE website (<https://www.ite.org/technical-resources/topics/trip-and-parking-generation/>).

The sites were surveyed in the 1990s and the 2010s in California, Colorado, Hawaii, Indiana, New Jersey, and Washington.

Table 9.4.2-C: LOS D Link Service Volumes

Facility Type		ADT		Peak Hour Directional	
		Class I	Class II	Class I	Class II
2 lanes undivided <sup>(1)</sup>	2L	17,700	14,800	880	750
2 lanes divided	2LD	18,600	15,500	920	790
4 lanes undivided <sup>(1)</sup>	4L	37,800	30,800	1,900	1,550
4 lanes divided	4LD	39,800	32,400	2,000	1,630
5 lanes two-way	5L	39,800	32,400	2,000	1,630
6 lanes divided	6LD	59,900	50,000	3,020	2,520
8 lanes divided	8LD	80,100	67,300	4,040	3,390

Notes:

Based on the 2012 FDOT Quality/LOS Handbook.

Class I - Roadways with 40 mph or higher posted speed limits.

Class II - Roadways with 35 mph or lower posted speed limits.

If heavy vehicle percentages for a facility are greater than 10 percent as determined by the Wellington Engineer then service volumes may be subject to a corresponding reduction. <sup>(1)</sup>

Service volumes for undivided roadways assume exclusive left turn lanes are provided at signalized intersections. If there are no left turn lanes reduce these values by 20 percent.

Table 9.4.2-D: LOS E Link Service Volumes

Facility Type		ADT		Peak Hour Directional	
		Class I	Class II	Class I	Class II
2 lanes undivided <sup>(1)</sup>	2L	17,700	15,600	880	800
2 lanes divided	2LD	18,600	16,400	920	840
4 lanes undivided <sup>(1)</sup>	4L	37,800	32,100	1,900	1,610
4 lanes divided	4LD	39,800	33,800	2,000	1,700
5 lanes two-way	5L	39,800	33,800	2,000	1,700
6 lanes divided	6LD	59,900	50,900	3,020	2560
8 lanes divided	8LD	80,100	68,100	4,040	3,420

Notes:

Based on the 2012 FDOT Quality/LOS Handbook.

Class I - Roadways with 40 mph or higher posted speed limits.

Class II - Roadways with 35 mph or lower posted speed limits.

If heavy vehicle percentages for facility are greater than 10 percent as determined by the Wellington Engineer then service volumes may be subject to a corresponding reduction. <sup>(1)</sup> Service volumes for undivided roadways assume exclusive left turn lanes are provided at signalized intersections. If there are no left turn lanes reduce these values by 20 percent.

**RE: Axis at Wellington Phase II  
Project #: 240505  
Traffic Performance Standards (TPS) Review**

Dear Mr. MacKenzie:

The Palm Beach County Traffic Division has reviewed the above referenced project Traffic Impact study, revised May 14, 2024, pursuant to the Traffic Performance Standards in Article 12 of the Palm Beach County (PBC) Unified Land Development Code (ULDC). The project is summarized as follows:

**Palm Beach County  
Board of County  
Commissioners**

Maria Sachs, Mayor

Maria G. Marino, Vice Mayor

Gregg K. Weiss

Michael A. Barnett

Marci Woodward

Sara Baxter

Mack Bernard

**County Administrator**

Verdenia C. Baker

<b>Municipality:</b>	Wellington
<b>Location:</b>	800 ft S of Forest Hill Blvd, W of Wellington Green Dr
<b>PCN:</b>	73-41-44-13-01-016-0000
<b>Access:</b>	2 full on Wellington Green Dr (1 existing, 1 proposed)
<b>Existing Uses:</b>	Soccer Fields = 3
<b>Proposed Uses:</b>	Replace with Multi-Family Mid-Rise=220 DU
<b>New Daily Trips:</b>	785
<b>New Peak Hour Trips:</b>	78 (17/61) AM; 37 (20/17) PM
<b>Proj Daily Trips:</b>	999
<b>Proj Peak Hour Trips:</b>	81 (19/62) AM; 86 (52/34) PM
<b>Build-out:</b>	December 31, 2029

Based on our review, the Traffic Division has determined the proposed development meets the Traffic Performance Standards of Palm Beach County. The project is not expected to have any significant impact on non-municipal roadways or intersections.

Please note the receipt of a TPS approval letter does not constitute the review and issuance of a Palm Beach County Right-of-Way (R/W) Construction Permit nor does it eliminate any requirements that may be deemed as site related. For work within Palm Beach County R/W, a detailed review of the project will be provided upon submittal for a R/W permit application. The project is required to comply with all Palm Beach County standards and may include R/W dedication.

No building permits are to be issued by the Village after the build-out date specified above. The County traffic concurrency approval is subject to the Project Aggregation Rules set forth in the Traffic Performance Standards Ordinance.

The approval letter shall be valid no longer than one year from date of issuance, unless an application for a Site Specific Development Order has been approved, an application for a Site Specific Development Order has been submitted, or the

*"An Equal Opportunity  
Affirmative Action Employer"*

Shaun G. MacKenzie, P.E.  
June 11, 2024  
Page 2

approval letter has been superseded by another approval letter for the same property.

If you have any questions regarding this determination, please contact me at 561-684-4030 or email [QBari@pbc.gov](mailto:QBari@pbc.gov).

Sincerely,

A handwritten signature in blue ink that reads "Quazi Bari".
