--	---------------	--------------------

## ProjectDox® Price Quotation

**Considerations:**

It is understood between the City of Wellington and Avolve that some concessions may be required to fit the existing 5 workflows into the designated 3 workflows associated to this quote. A workflow that varies in design due to different steps of the process, different email reminder timers, due dates or use of groups, such as the permit technician to key steps of the process requires its own process to run within the application. Initial Identified differences are email reminder timers and due dates of the Workflow 30 verse the Workflow 5, Revisions process permission differences, and engineering removal of the review QA step as compared to building review. If concessions cannot be made to accommodate the business processes into the 3 workflows an additional quote and LOE will be required to implement the changes and/or additional workflows.
