Introduction

The purpose of this market study is to assess the viability, market demand and economic impact of a luxury residential, equestrian-centric community on the northeast corner of South Shore Boulevard and Pierson Road in Wellington. This market study has been prepared with consideration of the ongoing area approvals and other development in the market area.

We believe the market can support the proposed equestrian-centric residential development at this time. The available market and land for new residential developments in the area is limited and demand is strong. The proposed equestrian development consists of 32 single-family homes and 268 multi-family homes on 101 acres. The target market is full-time and part-time equestrian related residents and visitors.

The continued population growth of the Wellington equestrian community and strong residential demand within and adjacent to the trade area further supports the absorption of this residential development. We anticipate the full absorption of this property will take approximately 36-48 months after approval.

This study highlights the market potential and economic impact of the equestrian-centric residential development being proposed along South Shore Boulevard and Pierson Road. The site location is shown on the cover page and below in *Figure 1*.

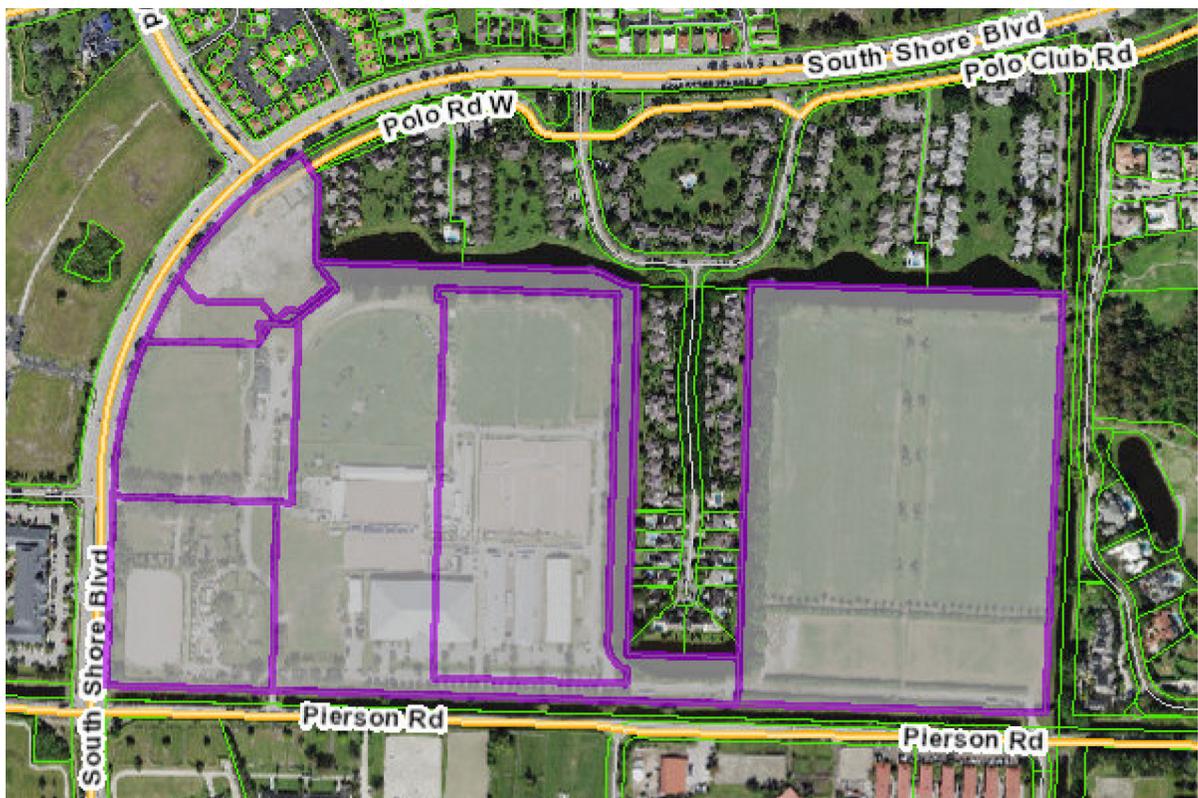

Figure 1 - Site Location

This study presents a summary of findings and recommendations regarding the market potential for the luxury residential development on this property.

The scope of this marketing and demographic study includes:

- An executive summary of Palm Beach County, Wellington, and local site growth and demographic characteristics
- A review of local residential market trends
- A review and analysis of the current market absorption rates
- A review of the residential marketplace
- An economic impact study utilizing IMPLAN, economic impact planning software
- A summary of the findings and recommendations

The proposed Equestrian Village Lagoon development is consistent with existing and proposed development in the surrounding area and the Wellington Comprehensive Plan.

Figure 2 - Proposed Site Plan

Executive Summary

Development of this Equestrian Village Lagoon is currently justified. The major factors affecting the decision to build this residential complex on the subject property include:

- Location, Location, Location
- Demand Analysis
- Demographic Trends
- Local Competition

The results of this analysis support the use of the property as a luxury equestrian-centric residential development site. Development of this site is consistent with future local and neighborhood plans, Wellington's Comprehensive Plan, and the surrounding area approvals. In addition, approval of this type of development is consistent with the existing character of the area.

Location

The location of this site is at the northeast corner of South Shore Boulevard and Pierson Road. This Wellington site offers access to minor collector roadways, South Shore Boulevard and Pierson Road, feeding into a major collector road, Big Blue Trace, and a minor arterial road, Forest Hill Boulevard. Further, South Shore Boulevard and Forest Hill Boulevard are expected to be widened per the Wellington Comprehensive Plan.

This Wellington site offers easy access to the I-95 and Turnpike transportation network as well as the retail hub anchored by The Mall at Wellington Green and extending south along State Road 7.

Demand Analysis

The demand analysis for this project supports the approval of the Equestrian Village Lagoon project at this time. The projected rate of population growth for the larger trade area, as well as for the central area of Palm Beach County, and the type of development proposed supports the need for additional residential units. Full absorption of the proposed development is expected within 36-48 months after approval.

In summary, the Wellington and central Palm Beach County market areas are strong and demand is currently in place for additional residential development. Data showing the strong residential development potential is contained in the attached market reports. This demand analysis also considers the extremely limited supply of new comparable product in and around the Wellington area.

Demographic Trends

Central Palm Beach County is a fast developing residential area in Palm Beach County, The population for the five-mile trade area is expected to approach 95,000 residents in 2027. This area is a magnet for families and empty nesters, the target demographic of the Equestrian Village Lagoon development.

Just over 94,000 residents currently live within the five-mile trade area, the population is expected to stay steady in the next five years without additional residential products. The median age of the population has held steady at 40.1 years in 2010 and 41.3 years in 2027. Currently, just over 26,000 housing units are owner occupied and just under 7,000 units are renter occupied. These numbers are expected to hold steady over the next five years.

The median household income in the five-mile trade area is \$104,237 with an expect increase to \$117,365 in the next five years. Currently 17.3% of households in the five-mile trade area fall into the \$200,000+ household income range, with an expected increase to 21.3% of households in the next five years.

Palm Beach County Highlights

Palm Beach County is Florida's third most populated county behind Dade and Broward Counties. Palm Beach County is also one of the largest geographic counties east of the Mississippi River. Palm Beach County is home to 39 municipalities. Approximately 44% of the County's population lives within these municipalities, with the remainder living in the unincorporated portions of the County.

Palm Beach County has been one of the Nation's fastest growing counties over the past decade. In the 1990 census, Palm Beach County ranked as the third fastest growing major metropolitan area in the country. Throughout the late 1990's and the early 2000's Palm Beach County experienced rapid economic growth. This trend is expected to continue, albeit at a slower pace into the next decade. Economic and population growth is due to a number of factors including: temperate climate, an expanding corporate base, low taxes, an educational system committed to excellence, an improving transportation network and wide ranging recreational and cultural activities.

Wellington Highlights

The Village of Wellington is an affluent and thriving community known for its many parks, highly rated schools and equestrian communities. Located in western Palm Beach County and southeast Florida, Wellington is highlighted by a strong sense of community based on equestrian centric interests.

Fire and police protection services within Wellington are provided by Palm Beach County Fire Rescue and Palm Beach County Sheriff's Office. Palm Beach County Fire Rescue is an all-hazards department with four stations located throughout the Village. Palm Beach County Sheriff's Office maintains a substation within the Village, located on Greenbriar Boulevard, fostering a strong presence in the community and an efficient response time.

With the draw of high profile equestrian festivals and competitions, excellent healthcare infrastructure as well as numerous shopping centers, restaurants and entertainment choices, the Village of Wellington home values have remained positive over the past two decades.

Central Palm Beach County

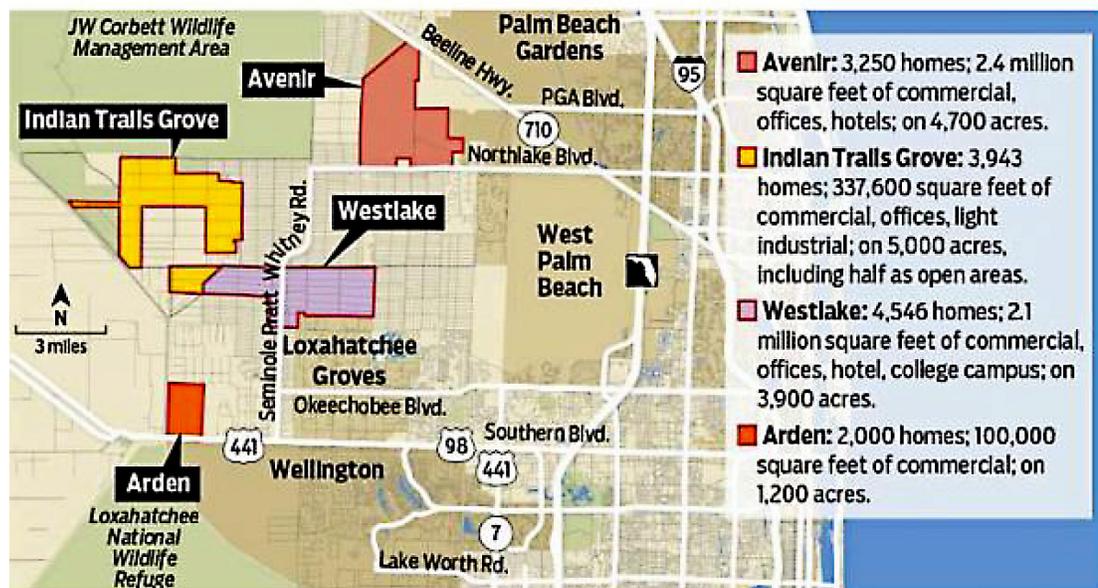

The mid-western areas of Palm Beach County are undergoing significant residential growth led by the municipalities of Wellington, Royal Palm Beach, Westlake and Palm Beach Gardens. Approvals are currently in place for over 16,000 new residential units with a significant portion of these already built or currently under construction.

In addition to the four major developments identified in the Palm Beach Post graphic below, in Royal Palm Beach the Tuttle Development at State Road 7 and Southern Boulevard has commenced with 300 of the approved 1,500 residential units anticipated to be developed on the site. The second 300 units, an apartment project, have recently broken ground. Commercial and other aspects of the project are expected to begin construction in the next 12-24 months. The Arden development in Palm Beach Gardens continues to attract residents to the far western region. Westlake has incorporated as a city and is working on building out under a 10 year plan. The Avenir development has tapped into the high end market including a Jack Nicklaus designed golf course and ultra exclusive high end residences. In addition to these developments, there are other infill projects, including a 110 unit townhome development by D.R. Horton in Royal Palm Beach expected to break ground within a year.

The western communities have grown over the last 50 years to not only include residential components but also strong commercial offerings anchored by the Wellington Mall and commercial development that runs the length of State Road 7. This trend is expected to continue as these four municipalities provide the framework for family and retirement based communities, strong recreational programs, and other community offerings serving both young families and retirees.

County's mid-western home boom

Four massive development projects, which are expected to bring 14,000 new homes to Palm Beach County's unincorporated mid-western area, are part of a statewide boom trend since Gov. Rick Scott scaled back Florida's growth laws five years ago.

ROBERT CALZADA / STAFF

Figure 5 - County's mid-western home boom

Population

The resident 2020 population in Palm Beach County was 1,492,191. The historical and projected growth for Palm Beach County is shown below in *Figure 6*. The 2020 Census recorded an increase of 122,909 residents (8.2% increase). The 2010 census recorded an increase of 17% over the 2000 census. In addition, Palm Beach County's population of prime working age residents, 20-54, comprises over 44% of the total population. Palm Beach County's population also includes approximately 26% retirees age 64+. In addition, 39% of the households in Palm Beach County include a family member over age 65. Palm Beach County population growth has returned to historical +/-2% per year increases. This growth rate results in an addition of 30,000 residents per year.

The retiree population in Palm Beach County is expected to grow to as much as 29% of the total County population by 2030 as compared to 26% in the 2000 Census, mirroring an expected 29% retiree population statewide. The increase in retiree population will increase the demand for additional services, businesses and industry, as retirees have higher levels of discretionary spending. The retiree population has greater disposable income and seek shopping and commercial services close to home.

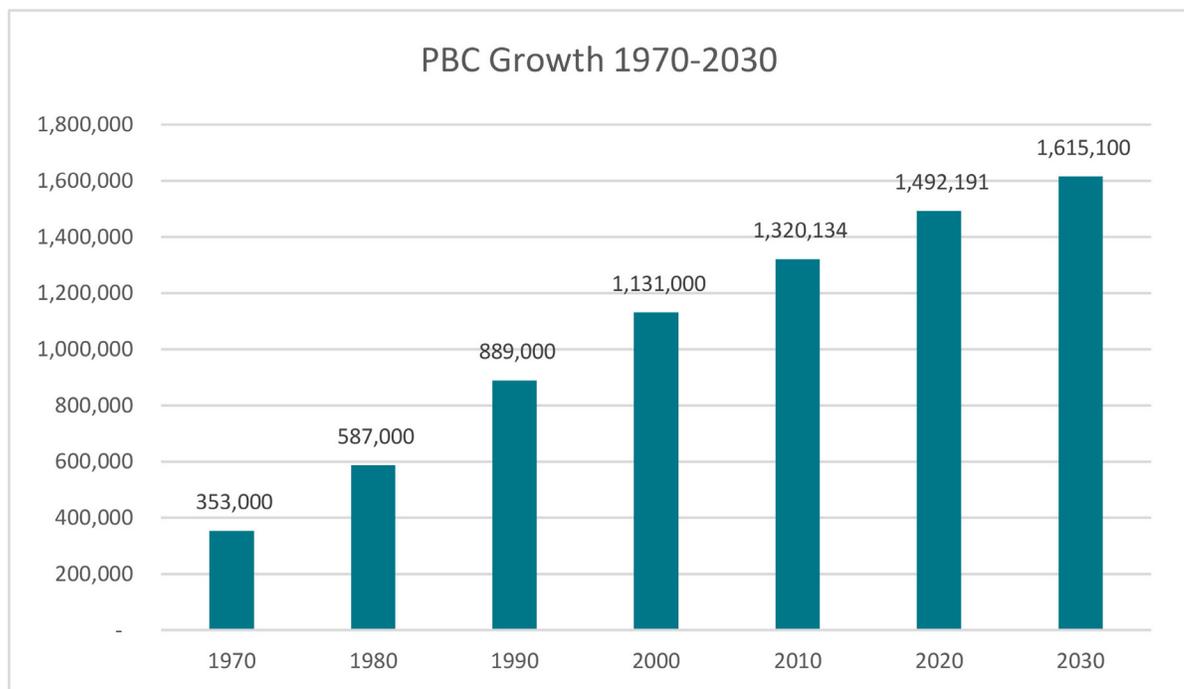

Figure 6 - Source: Palm Beach County Planning

Economy

The economy in Palm Beach County remains very strong due to a diversified employment base, strong tourism and seasonal residents visiting for extended periods of time. Palm Beach’s mild climate and favorable tax base makes this an inviting home to work, live and play.

Income in Palm Beach County continues to grow faster than national and state averages. The overall Palm Beach economy is very strong having diversified with tourism, industrial development, and growth in the biomedical and retiree services sectors. In 2020, Palm Beach County had an estimated per capita personal income (PCPI) of \$87,478. This PCPI ranked 4th in the state and was 157% of the state average of \$55,675, and 147% of the national average of \$59,510.

The median income in Palm Beach County has been growing steadily with the current estimate at \$60,000 and the median family income of \$74,000. Our labor force as a percentage of the population has grown from 61.4 to 63.0% over the past decade.

In 2020, Palm Beach County had a total personal income (TPI) of \$131,881,463. This TPI ranked 2nd in the state and accounted for 10.9% of the state total. In 2010, the TPI of Palm Beach was \$72,902,682, ranking 2nd in the state.

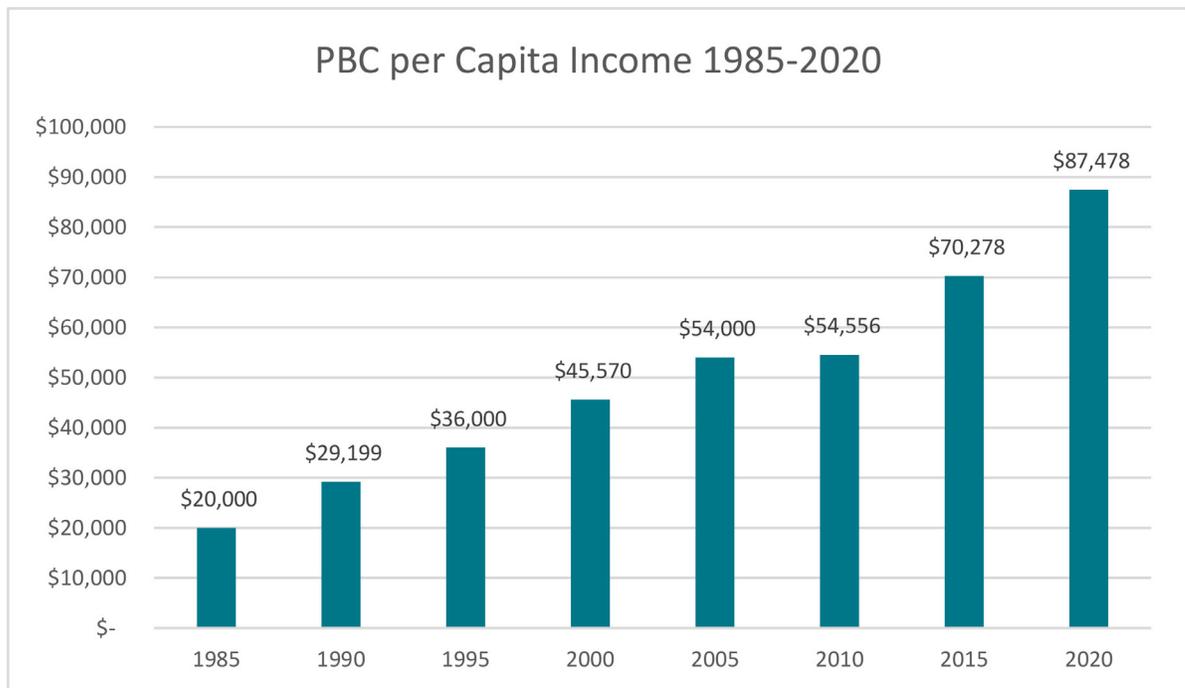

Figure 7 - Source: Florida Legislature Office of EDR

Employment

From 2000 to 2020, Palm Beach County saw consistent job growth in the service industries, construction, wholesale trade, real estate, business services, health and medical services, and retail trade. Much of this growth is due to the increasing retiree population and the economic base necessary to support the expanding population.

The changes in service sector employment between 1995 and 2004 placed Palm Beach County, in growth of services jobs, among the top 100 labor markets nationwide, according to the U.S. Bureau of Labor Statistics. The year to year change for Palm Beach County was 5% or the addition of 7,400 new service industry related jobs.

Palm Beach County ranks fifth nationally, in terms of percentage of the labor force working in the service industries. Over 38% of the work force is working in service classified jobs. Additionally, the County's economic base has been diversifying with the addition of several major corporations and expansion of many small local businesses. Over the past five years there has been a broad effort on the part of the community to diversify the economic base by adding biotech and other medical research related business based in Palm Beach County.

The national economic downturn related to the housing industry was reflected in the unemployment rate in Palm Beach County which peaked at 12% in 2010. The pandemic and economic shutdown in 2020 spiked the unemployment rate to 8%. In 2021, the rate of unemployment rate lowered to 4.3% as the vaccine was approved and distributed. All signs point to a steady improvement and a return to historical growth with low unemployment rates in the future. Palm Beach County has well-weathered the transient national economic downturns, quickly bouncing back with growth exceeding national and state trends.

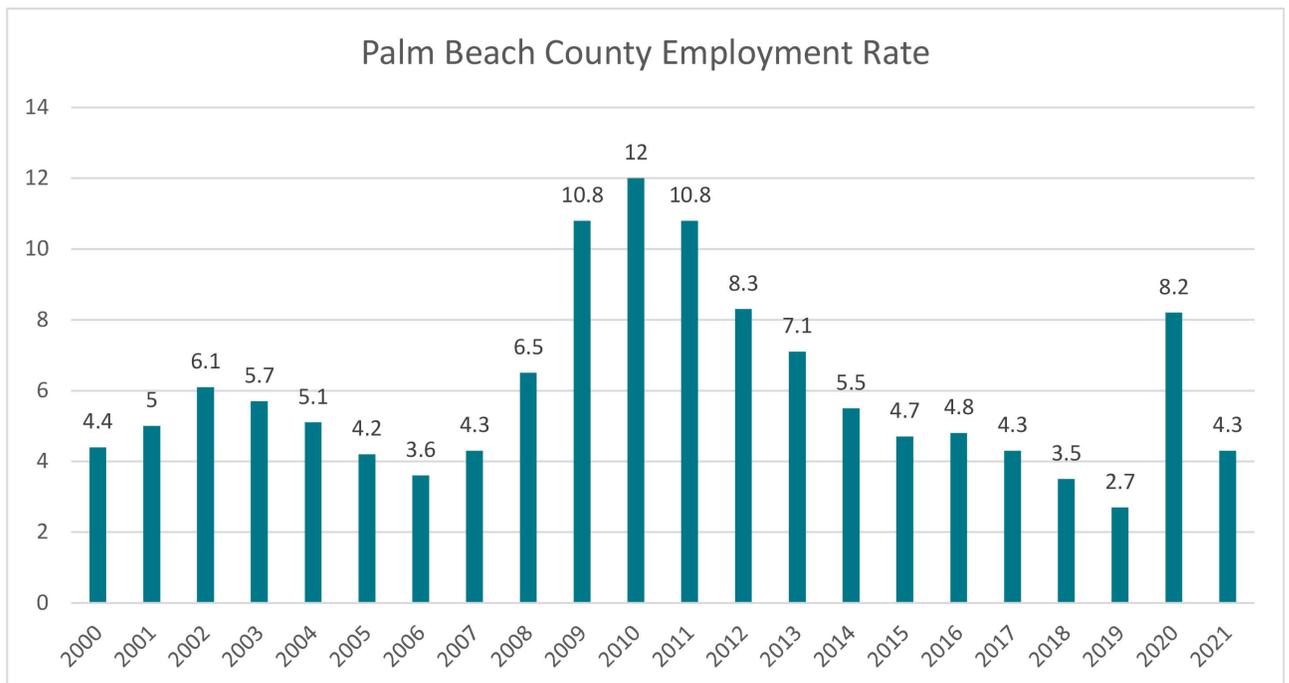

Figure 8 - Source: Bureau of Labor Statistics

Housing Review

The Palm Beach County housing sector of the economy is robust and strong. New single and multi-family housing permits are on the rise to support the growing population and families moving into larger homes. Central Palm Beach County can expect to see significant residential building permits with the development of western properties and redevelopment of urban site. Home and condominium sales have remained strong through the pandemic and many out of state residents are accelerating plans for a second of semi-retirement home.

Palm Beach County’s population has returned to a positive growth rate and is returning to the historical average growth rate of almost 2%. We expect to see continued improvement over the next three to five years.

Figures 9 & 10 highlight the history of building permits in Palm Beach County and compare the number of building permits to the rate of growth. As Palm Beach returns to its historical growth rate, the home building and construction segments of the economy will improve, thus improving the demand for additional residential space.

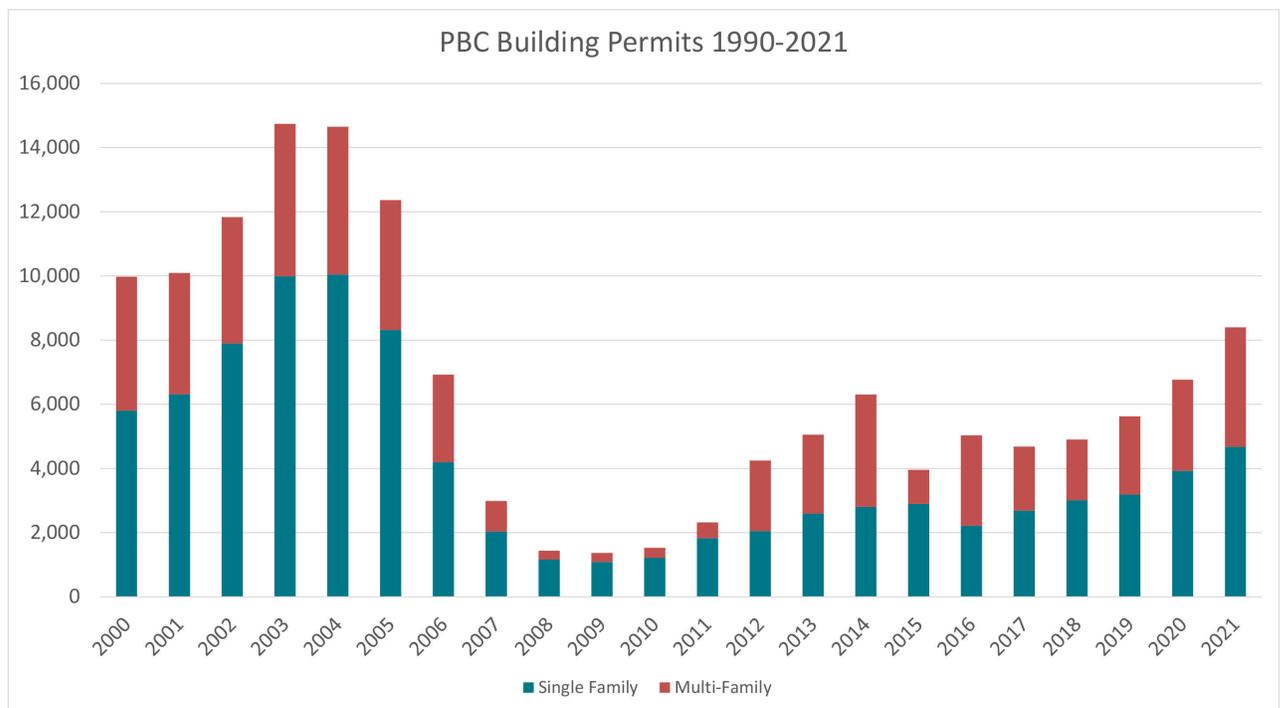

Figure 9 - PBC Building Permits

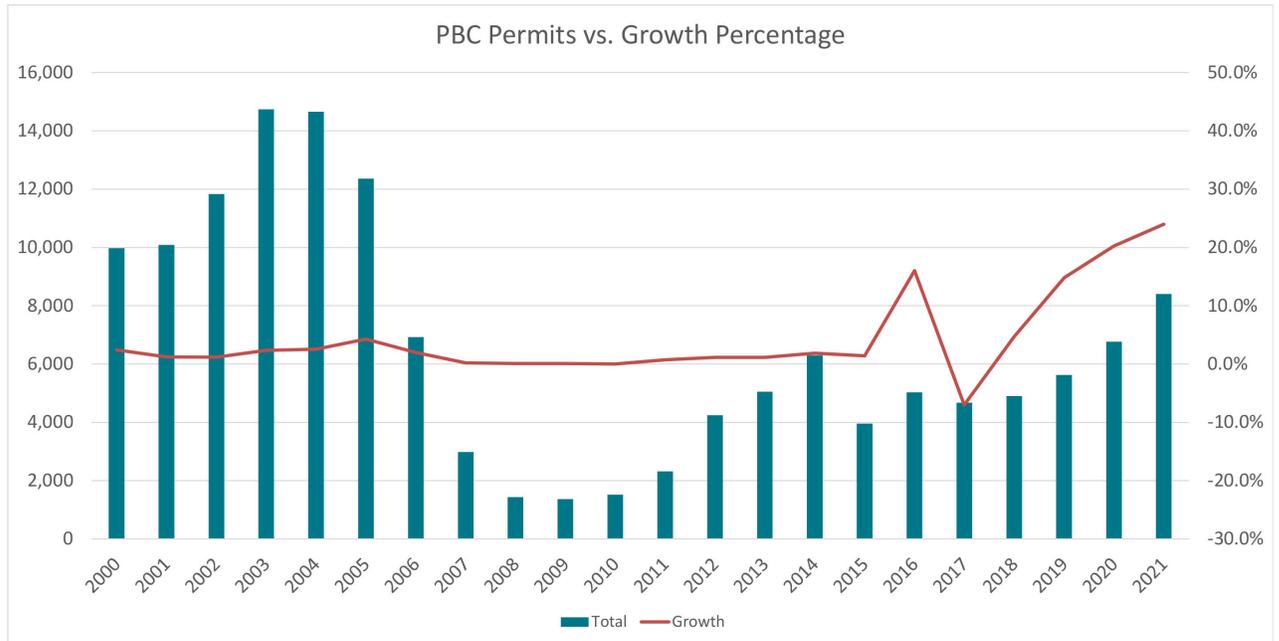

Figure 10 - Permit vs % Growth

Trade/Market Area

Population

The population within the five mile radius of this site is summarized in the table below.

	2010	2020	2022	2027
3 Mile Radius	41,797	42,659	42,467	42,403
5 Mile Radius	86,057	94,029	94,274	94,851
7 Mile Radius	150,709	169,476	173,516	176,659

Sources: 2020 Census, Esri, Zabik & Associates, Inc.

Growth is expected to continue at a constant rate over the next 10 years as the remaining approved residential space is built out.

Market Study Parameters

Population growth in both the trade area for this development and for Wellington is estimated to continue to be steady, resulting in an addition of over 500 residents in the five-mile area and 3,000 in the seven-mile area over the next five years.

Current Wellington Area Population Projections

The population of Wellington is stable as the community is largely built out. The Village of Wellington has updated their Comprehensive Plan with a focus on expansion of the local economy and reinvestment in existing, aging neighborhoods and commercial spaces.

Residential Market Review

The Equestrian Village Lagoon site is located in central Palm Beach County. This area is characterized by a diverse mix of retail, commercial, residential and recreation that support the local population. The location of the Equestrian Village Lagoon site will offer an additional equestrian-centric luxury residential development that will complement the existing concentration in the area. This development is the result of the bright economic outlook that is encouraging developers to move forward with projects of this character.

Palm Beach County economic engine has historically been fueled by population growth and an increase in the available discretionary income of its residents. This area of the County is no exception as the majority of the residents are over age 40 with high levels of discretionary income. The increase in purchasing power of the neighborhoods surrounding this site has been recognized by some of the Nation's leading retailers including Apple, Whole Foods, and Trader Joe's.

The median sale price of single-family homes in Palm Beach County rose 22% from \$389,500 in 2020 to \$475,000 in 2021. Median sale prices rose another 24% to \$620,000 in June of 2022, with virtually all sellers receiving 100% of the original listing price. Single-family home inventory was down 48% from 2020 to 2021 and has recovered to 2020 inventory numbers as of June 2022.

The median sale price of multi-family homes, townhomes and condos, rose 34.5% from \$205,000 in 2020 to \$240,000 in 2021. Median sale price of multi-family homes rose another 34% to \$312,500 in June 2022, with virtually all sellers receiving 100% of the original listing price. Multi-family home inventory was down 65% from 2020 to 2021 and has risen only 8% as of June 2022.

In February of 2021, Palm Beach County luxury single-family home sales spiked 62%. Single-family homes are going under contract 60% faster as of June 2022 than in 2020. The volume of new listings of single-family homes decreased by 52.5% from 2020 to 2021 indicating home buyers are putting roots down in Palm Beach County.

Consistency with Comprehensive Plan

The proposed development is consistent with the Wellington Comprehensive Plan.

As outlined in the development application:

This development will ensure the hometown character of Wellington is maintained while fostering development and redevelopment as compatible with and improves existing neighborhoods and commercial areas.

This development complies with:

Land Use and Community Design Goals

LU&CD 1 Land Uses

“Enhance the quality and character of the Wellington’s neighborhoods, commercial districts, travel corridors, and equestrian community to continue to maintain a Great Hometown!”

The proposed development complies with the commercial and light industrial standards, and the zoning district standards, outlined in Objective 1 of the Comprehensive Plan.

LU&CD 2 Neighborhood & Districts

“Maintain a high quality of life through community design and appearance within Wellington’s neighborhoods and districts.”

The development will be compatible with and will improve existing commercial areas, and is in line with Objective 2.

LU&CD 3 Protect Our Investment

“Ensure that established land use patterns are protected and the distinctive characteristics of the individual communities are preserved, discourage urban sprawl, promote energy efficiency, maintain a high standard of aesthetics, respect environmental constraints, and provide services at the adopted levels of service.”

This development meets all of the concurrency and all utilities are available to meet the required level of service.

LU&CD 4 Sustainability

“Promote development and reinvestment sensitive to the environment, fosters improved social and economic sustainability, and reduces public facility and service costs.

This project is being planned with the Village of Wellington and all Palm Beach County regulatory agencies.

Return on Investment

Economic Impact Study Utilizing IMPLAN

IMPLAN is a platform that combines a set of extensive databases, economic factors, multipliers, and demographic statistics with a highly refined modeling system that is fully customizable. Together, Implan software and robust data helps to gain insight into an industry's contributions to a region, quantify the impact of an event to the economy, examine the effects of a new or existing business, model the impacts of expected growth or changes, or study any other event specific to the economy of a particular region and how it will be impacted.

Every dollar that is invested by the Equestrian Village Lagoon project will result in \$2 to \$3 dollars of community investment. The Equestrian Village Lagoon site is working to maximize the leveraging of this asset. Close coordination with the Village of Wellington, efficient and practical design with forward planning will result in the success of the Equestrian Village Lagoon development.

Equestrian Village Lagoon	
Land Purchase	\$50,000,000
Construction	\$350,000,000
A/E and Project Professionals	\$25,000,000
Permits, Fees & Soft Costs	\$25,000,000
Total Project Investment	\$450,000,000

The total economic impact to the economy for this development will be \$1.1 billion including direct, indirect, and individual benefits.

The results of this analysis determined that the following jobs will be created during development and construction:

Direct Jobs	1,000
Indirect Jobs	400
Induced Jobs	425
Total Jobs	1,825

The results of this analysis determined that the following jobs will be created after construction and provide long term employment opportunities.

Direct Jobs	200
Indirect Jobs	60
Induced Jobs	80
Total Jobs	340

Direct Impacts are the initial, immediate economic activities (jobs and income) generated by a project or development. Direct impact associated with the development coincide with the first round of spending in the economy. For example, a new business with a payroll of \$1,000,000, purchases from local suppliers of \$1,000,000 and property taxes of \$50,000, would directly contribute \$2,050,000 to the local economy.

Indirect Impacts are the production, employment and income changes occurring in other businesses/industries in the community that supply inputs to the development industry.

Induced Impacts are the effects of spending by the households in the local economy as the result of direct and indirect effects from an economic activity (i.e. project, event, etc.). The induced effects arise when employees who are working for the project (e.g. new business) spend their new income in the community.

Tax Base Impact

The Equestrian Village Lagoon project will make a significant addition to the Village of Wellington's ad valorem tax collection. We estimate, upon completion, the proposed project will add approximately \$449 million to the Village's tax base resulting in additional annual revenue of approximately \$1.15 million.

Wellington currently receives approximately \$21.8 million in ad valorem tax revenue. Upon buildout, the proposed project is expected to provide an additional 5% ad valorem revenue.

Ad Valorem Tax Millage Rate	
County Operating	4.781
County Debit	0.033
Fire Rescue	3.458
Library Operating	0.549
Library Debt	0.033
PBC School District (State Law)	3.627
PBC School District (Local Board)	3.248
Wellington Operating	2.470
South FL Water Management Basin	0.115
South FL Water Management District	0.106
Everglades Construction	0.036
FL Inland Navigation District	0.032
Children's Services Council	0.623
Health Care District	0.726
Total	19.839

The total additional ad valorem tax impact for this development will be approximately \$9.23 million, with \$1.15 million designated for the Village of Wellington. This is an increase of over 5% of the current ad valorem revenue for the Village of Wellington.

Findings and Recommendations

1. Development of the Equestrian Village Lagoon site at South Shore Boulevard and Pierson Road is consistent with the Wellington Comprehensive Plan, good planning practices, and currently ongoing area development.
2. Development of this equestrian-centric residential development, as outlined in the full development application, will have no adverse impacts on the local infrastructure, utilities or roadways. This development fits nicely with other proposed and existing development for the surrounding area and provides additional residential and equestrian opportunities to the community.
3. The location of the Equestrian Village Lagoon site in the Village of Wellington offers an outstanding location for an equestrian-centric residential community to locate.
4. Construction of the Equestrian Village Lagoon site is currently justified. This is based on current demand for communities of this type, the growing population of the area to be served, and the location, access and distance to the interstate highway system.

GEOGRAPHY

Geography		
Population per square mile, 2020	1,370.7	759.7
Population per square mile, 2010	1,258.9	670.2
Land area in square miles, 2020	44.97	1,964.30
Land area in square miles, 2010	44.89	1,969.76
FIPS Code	1275812	12099

[About datasets used in this table](#)

Value Notes

 Estimates are not comparable to other geographic levels due to methodology differences that may exist between different data sources.

Some estimates presented here come from sample data, and thus have sampling errors that may render some apparent differences between geographies statistically indistinguishable. Click the Quick Info  icon to the row in TABLE view to learn about sampling error.

The vintage year (e.g., V2021) refers to the final year of the series (2020 thru 2021). Different vintage years of estimates are not comparable.

Users should exercise caution when comparing 2016-2020 ACS 5-year estimates to other ACS estimates. For more information, please visit the [2020 5-year ACS Comparison Guidance](#) page.

Fact Notes

- (a) Includes persons reporting only one race
- (c) Economic Census - Puerto Rico data are not comparable to U.S. Economic Census data
- (b) Hispanics may be of any race, so also are included in applicable race categories

Value Flags

- Either no or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest or upper in open ended distribution.
- F Fewer than 25 firms
- D Suppressed to avoid disclosure of confidential information
- N Data for this geographic area cannot be displayed because the number of sample cases is too small.
- FN Footnote on this item in place of data
- X Not applicable
- S Suppressed; does not meet publication standards
- NA Not available
- Z Value greater than zero but less than half unit of measure shown

QuickFacts data are derived from: Population Estimates, American Community Survey, Census of Population and Housing, Current Population Survey, Small Area Health Insurance Estimates, Small Area Income and Estimates, State and County Housing Unit Estimates, County Business Patterns, Nonemployer Statistics, Economic Census, Survey of Business Owners, Building Permits.

Winding Trails:

Project Manager: Kelly Ferraiolo, Senior Planner (kferraiolo@wellingtonfl.gov or 561.753.5268)

Petition Numbers:

- Comprehensive Plan Amendments: 16-058 (2016-021 CPA3)
- Zoning Text Amendment: 16-053 (ZTA 2016-002)
- Rezoning: 16-059 (2016-022 REZ)
- Master Plan Amendment: 16-060 (2016-023 MPA3)
- Site Plan: 16-061 (2016-16 SP6).

Location: Northeast corner of Aeroclub Drive and Greenbriar Boulevard.

Status: Staff Review

Description of Request for Winding Trails:

Coteleur and Hearing, the agent, has submitted the following applications to develop the golf course into nine (9) single family lots with barns, grooms quarter and other ancillary equestrian facilities:

- A Comprehensive Plan Amendment to change the Future Land Use Map designation for the property to Residential "B", which will allow for the development of single family ranchette type lots. The Amendment will also expand the Equestrian Preserve Area to encompass the property. Equestrian trails maps within the Equestrian Preservation Element will be updated accordingly. All subsequent applications rely on the approval of the Comprehensive Plan Amendment. Without approval, all other applications will not move forward.
- A Zoning Text Amendment (ZTA) to Section 6.10 of the Wellington's LDRs, Equestrian Overlay Zoning District (EOZD), to create Subarea F and establish regulations as the property is unique and does not coincide with any of the existing Subarea's that are adopted in the EOZD.
- A Rezoning application to change the Zoning designation to Agricultural Residential/Planned Development/Equestrian Overlay Zoning District (AR/PUD/EOZD). Additionally, Winding Trails will be identified as Subarea F.
- A Master Plan Amendment to The Landings at Wellington PUD is proposed to delineate Winding Trails from Pod "D" by creating Pod "D-1". Pod "D-1" will be a total of 29 acres and consist of nine (9) single family dwelling units,

<https://www.wellingtonfl.gov/194/Planning-and-Zoning-Active-Project-Appli>

Home > Government > Departments > Planning, Zoning, & Building > Planning & Zoning > Planning and Zoning Active Project Applications

nine (9) barns with grooms quarters and a maximum of 90 stalls. The amendment will also add three (3) access points along Aeroclub Drive to access Lots 5-9 and to add two (2) access points along Greenbriar Boulevard to access Lots 1-4.

- A Site Plan application for the project that provides for the layout of each lot including barns, manure bins, landscape buffers, and access drives, etc . This application was certified by the Development Review Committee (DRC) at the July 13, 2016 DRC meeting pending Council approval of all of the above applications.

VI. TOTAL ECONOMIC IMPACT OF 2021 WEF	18

I. Introduction

This report contains the results of a study of the 2021 Winter Equestrian Festival (WEF) held at the Palm Beach International Equestrian Center in Wellington, Palm Beach County, Florida. The purpose of the study was to estimate the economic impact of the WEF on the Palm Beach County Economy, including the impact on Gross Domestic Product (GDP), employment (jobs), and labor earnings (wages and salaries plus supplements to wages and salaries plus proprietors' income).

The report was prepared for the Palm Beach County Sports Commission. The Sports Commission is a private, not-for-profit organization contracted by Palm Beach County to promote and market the County as a sports and sports tourism destination. The Commission attracts sports events and activities to the County to create economic impacts, stimulate tourist tax revenues and maximize utilization of sport venues.

The report contains six sections. Following the Introduction, Section II is an Executive Summary that highlights key findings of the study. Section III provides details of an extensive comprehensive internet survey of WEF 2021 participants, including riders, trainers and horse owners. The WEF was closed to the general public this year because of COVID 19 and so the survey did not include visitors. Such visitors come to the WEF in order to watch the horses competing and practicing (schooling) as well as to visit the stabling areas.

A description of the results of the internet survey of participants with special emphasis on their expenditures on their horses during the WEF follows in Section IV. Non-resident participants make tourist expenditures (lodging, dining, shopping, local transportation etc.) in Palm Beach County during the WEF and an analysis of these expenditures is presented in Section V. The last section of the report contains the total economic impact of the 2021 WEF, which is the sum of the impacts of horse expenditures and

visitor expenditures. It also contains the impact of WEF visitors on paid room nights in the Palm Beach County lodging industry.

The authors of this report have extensive experience in economic impact studies of local and regional economies. We would like to note that the equestrian industry is extremely complex in regard to accurately assessing its economic impact. For this reason, we would like to thank the riders, owners and production staff who provided information during the course of our research. The riders, horse owners and trainers especially provided valuable information for the internet survey.

II. Executive Summary

1. The Winter Equestrian Festival (WEF) normally has 12 consecutive weeks of US Equestrian Federation (USEF) and Fédération Equestre Internationale (FEI) sanctioned competitions that begin in the second week of January. The 2020 WEF closed one week early because of the COVID-19 pandemic. In 2021, WEF began one week earlier than normal to make up for the early closure in 2020.
2. The 2021 Winter Equestrian Festival contributed \$279 million and 2,880 jobs to the Palm Beach economy. This resulted in labor earnings of \$83.9 million with average earnings of \$29,131 per job.
3. Most of the income and employment (79.3 percent) were generated from horse expenditures by participants (riders, owners and trainers) of \$168 million; tourist expenditures of \$35.6 million generated 20.7 percent. All the tourist expenditures were generated by participants (rider, owners and trainers) because WEF 2021 was closed to the general public because of the COVID 19 pandemic.
4. The data used to generate the economic impact estimates for this study were obtained from an internet survey of almost 3,000 email addresses obtained from Equestrian Sport Productions (ESP) who produce the WEF. The response rate to the survey was 32.2 percent (768 returned questionnaires).¹ This was greater than our targets of a 20 percent response rate and at least 400 completed surveys returned.
5. The 2021 questionnaire was a modification of the 2020 questionnaire based on experience with the 2020 questionnaire.

6. Direct horse expenditures amounted to \$133 million with an average of \$23,164 per horse. Variation among participants reflected their different numbers of horses and differences in the length of time they were at the WEF. The average number of horses per participant was 3, with more than 50 percent involved with 1 or two horses. The average time participants spent at the WEF was 9.73 weeks or 2.43 months.
7. Direct tourist expenditures of \$35.6 million were made by non-resident participants. This amounted to \$20,208 per visiting party. Variation among nonresident participants reflected differences in party sizes and differences in lengths of stay. The average party size was 2.7 persons and the average length of stay was 66.5 nights. Another factor was the share of visitors who paid for their lodging (72.3 percent). Some nonresident participants owned the condominiums or house where they lodged. WEF 2021 nonresident participants generated 149,894 paid room nights for the Palm Beach County lodging industry. This estimate reflects the absence of attendees at WEF 2021, but also the increased duration of the event.

III. Description of the Internet Survey

The economic impact of WEF 2021 results from the expenditures made in connection with the Festival by participants, namely riders, owners, and trainers. In contrast to previous WEFs, the events were closed to the general public in 2021 because of the COVID 19 pandemic so there was no economic impact from the spending by attendees. Data were collected by means of an internet survey sent to email addresses. The internet survey used Survey Monkey software.

An internet survey sent out by email has several advantages when compared with traditional mail surveys, telephone surveys and personal interview surveys. It is the least costly and fastest among the different methods. The questionnaire is self-administered (as is also true of a traditional mail survey) avoiding the costs of interviewers. The questionnaire is delivered to respondents almost instantly. Respondents can fill out the questionnaire quickly by clicking a mouse for most questions and contact information is provided for those who might have questions. Branching among questions on the questionnaire is seamless to respondents since earlier answers can direct the respondent to the appropriate section of the questionnaire instantly. Reminders can be sent to non-respondents by clicking a button.

By sending out the survey at the end of the WEF, respondents can give actual expenditures data rather than a projection of future expenditures. This collection of data “ex post” is regarded as “best practice” in expenditure surveys.

A database of almost 3,000 unduplicated email addresses of participants was obtained from ESP Productions who produce WEF. The entries in the database contained information supplied by the participants as they registered as riders, owners or trainers. Participants could register for more than one registration category, and this resulted in duplicate emails which were removed from the sample surveyed. A total of 2,697 email addresses were contacted. The Survey Monkey software indicated that

234 emails “bounced because of an invalid email address or because the address did not accept email surveys. Additionally, 78 of those contacted “opted out” of the survey by clicking an unsubscribe button. The remaining 2,385 email addresses were the “population” surveyed. The returned questionnaires were viewed as the sample.

A modification of the 2020 questionnaire was sent out in 2021. The modifications reflected our experience in 2020, the first year we had surveyed a WEF population. For example, our experience showed that respondents often failed to complete the survey, and we added some questions at the beginning of the survey to obtain important respondent characteristics, rather than later in the survey when the information was needed to direct the respondent to an appropriate branch of questions. The survey was sent out in a series of 3 “waves” beginning on March 28, 2021 so that adjustments could be made to the questionnaire in later waves if deemed necessary. No adjustments to the questionnaire were required.

The questionnaire contained two major parts: collection of data on horse expenditures including stabling, feed, training, local horse transportation and so on, and collection of data on the tourist expenditures made by non-resident participants including lodging, dining, groceries, shopping, local transportation and so on. The itemized list of horse expenditures was the same as had been collected in previous WEF surveys, and the itemized list of tourist expenditures contained the standard items collected in tourism research. The questionnaire contained 20 questions, down from 26 in 2020.

Survey Monkey provides the capability to send reminders to nonrespondents by clicking a button. Five reminders were sent later in April with the last reminder was sent on April 30th, 2021.

Survey Response Rate

The closest of the alternative survey methods to an email survey is a traditional mail survey because they are both self-administered. Our experience with mail surveys suggest that 20 percent is an adequate response rate because many respondents can refuse to participate, for a variety of legitimate

reasons. A minimum number of 400 returned questionnaires is required to ensure sufficiently accurate results.

A total of 768 responses were received after the initial e-mailing and five reminders. The survey was “closed” to additional responses on May 10th. The survey response rate was 32.2 percent which was higher than the 26.5 percent reported for 2020. It was comfortably above the target we regarded as a minimum (20 percent). The number of returned questionnaires (768) exceeded our goal of 400, although not all returned questionnaires contained data for all questions.

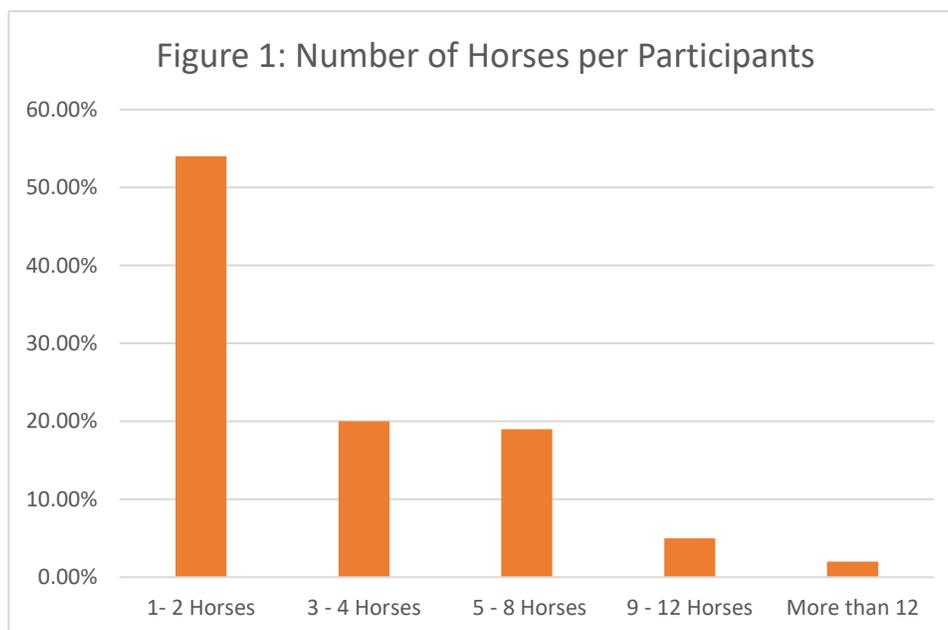

IV. Expenditures on Horses by WEF 2021 Participants

The internet survey discussed above is the source of the data on Horse Expenditures discussed in this section of the report. Horse expenditures were incurred by WEF participants, namely, riders, owners and trainers. Horse expenditures include stabling, feed, manure disposal, training, equipment maintenance & purchase, vehicle fuel & repairs, local horse transportation, supplements & farrier/shoeing services, and other items.

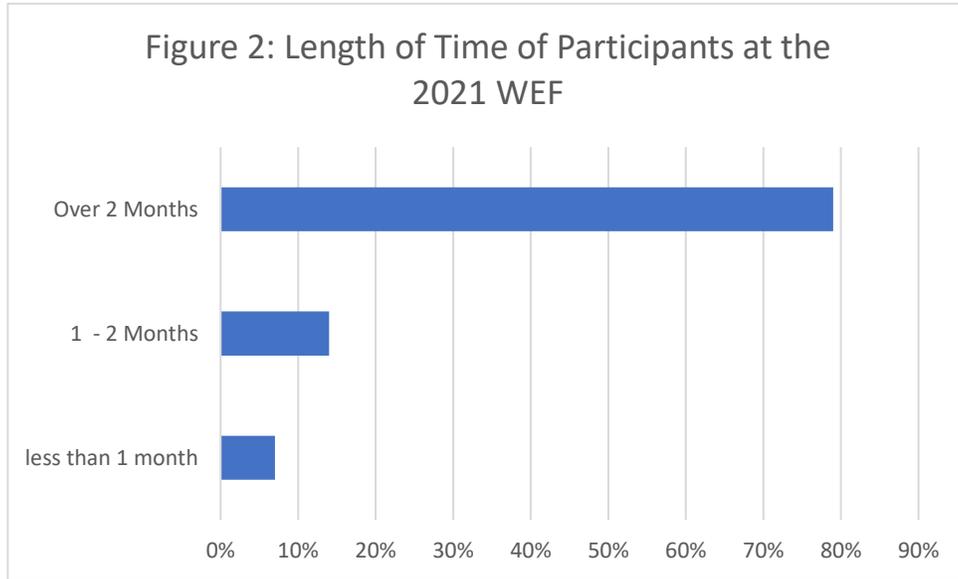

Participant Characteristics

Two characteristics of participants are important in explaining the level of horse expenditures by participants, namely, the number of horses they were involved with at the WEF, and the length of time (months or weeks) they participated in the WEF. Participants with larger numbers of horses had higher expenditures as did participants who spent longer periods of time.

The average number of horses per participant was 2.4 with 56% of the participants involved with 1 or 2 horses. About three-fourths of the participants were involved with fewer than 4 horses.

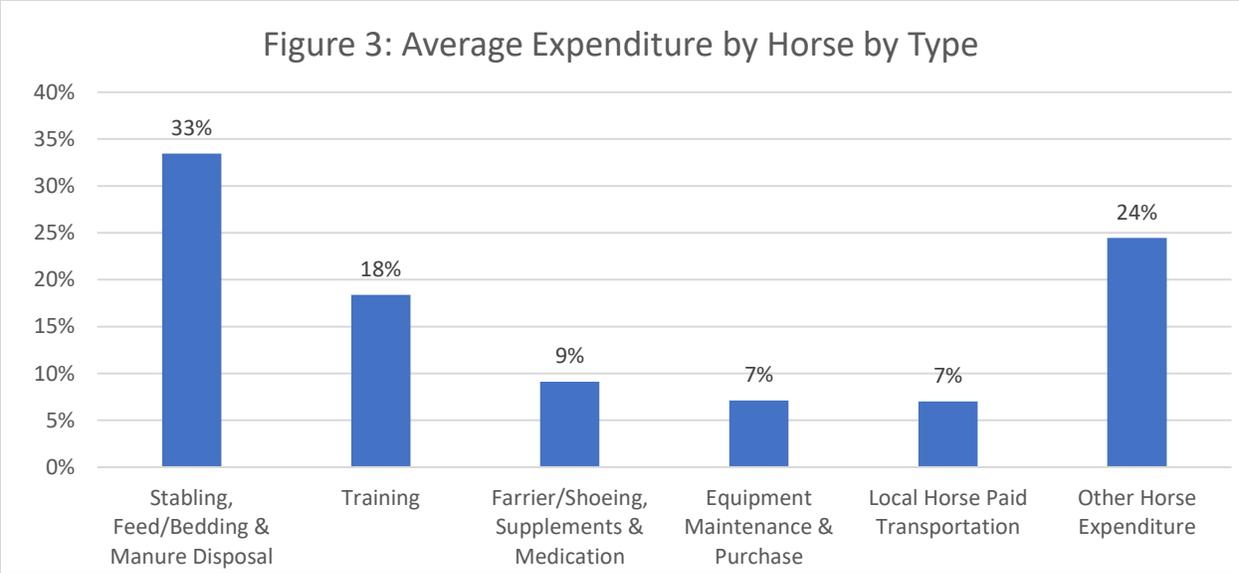

The average length of stay for the horses at the 2021 WEF was 9.7 weeks or 2.43 months. The percent of participants who spent less than one month was 6.83 %, and over 70% of the participants stayed more than 2 months.²

Average Horse Expenditure

The average participant spent \$23,164 per horse at the 2021 WEF. Stabling, feed and manure disposal accounted for 33 percent, training accounted for 18 percent, farrier/shoeing accounted for 9 percent, and equipment maintenance and purchases and local paid horse transportation each accounted for 7 percent. There was also a residual “Other” category which contained a variety of items accounted for 24 percent, some of which was caused by the COVID 19 pandemic³. The average expenditure per horse for the 2021 WEF was slightly lower than the average for the 2020 WEF.

Total Horse Expenditure

The survey provided an estimate of the number of horses involved with WEF 21, namely, 5,724. This was less than the number of horses involved with WEF 2020. COVID restrictions on travel, particularly internationally, provided some explanation for the reduction.

Multiplying the average expenditures for each category of horse expenditure by the total number of horses that attended the 2021 WEF resulted in total expenditure of \$132.6 million. The estimate is down from the estimate for 2020 (\$138.4 million). These expenditures are labeled as “direct expenditures” in Table 1 because they result from the direct actions of participants. Table 1 provides direct expenditures by spending category.

Direct horse expenditure at the 2021 WEF resulted in indirect horse-related expenditure. These are the additional expenditures made by businesses in the industries back up the various supply chains that provide the goods and services purchased by the industries directly affected. There are also expenditures made by the workers who received increased incomes because of the expansion of the supply chains. The spending by workers goes on consumer goods and services such as lodging, food, educational, medical, and transportation services and so on.

Direct & Indirect Horse Expenditure

Indirect expenditures reflect the effect of the direct expenditures “rippling” through the economy. The total of the direct and indirect effect expenditures is the impact of horse expenditures on the production of the Palm Beach County economy (GDP). The spending by horse owners, riders, and trainers at the 2021 WEF increased the GDP of Palm Beach County by \$221.1 million, the sum of direct and indirect spending.

Table 1 The Expansion of Palm Beach County GDP due to Horse Expenditures by 2021 WEF Participants (Millions of Dollars)			
	Direct Expenditures	Indirect Expenditures	Total Expenditures
Stabling, Feed/Bedding & Manure Disposal	\$44.4	\$29.0	\$73.4
Training	\$24.4	\$17.3	\$41.7
Farrier/Shoeing, Supplements & Medication	\$12.1	\$6.4	\$18.5
Equipment Maintenance & Purchase	\$9.4	\$6.1	\$15.6
Local Horse Paid Transportation	\$9.9	\$6.2	\$16.2
Other Horse Expenditure	\$32.4	\$23.4	\$55.8
Total	\$132.6	\$88.5	\$221.1

The multipliers used to calculate the total direct expenditures by type were obtained from a special run of the RIMS II Model of Palm Beach County obtained from the Bureau of Economic Analysis (BEA) of the US Department of Commerce. The BEA produces the official GDP estimates for the US nation, states, and counties as well as RIMS II models for the various regions of the national economy. Each dollar of direct expenditure at the 2021 WEF resulted in an overall multiplier impact of 1.673.

Jobs Created and Labor Earnings

As the Palm Beach GDP expands due to the spending by participants at the 2021 WEF, jobs are created for Palm Beach County workers and their labor earnings are increased. The RIMS II Model produces estimates of the number of jobs created as well as the increase in earnings. The number of Jobs created, and the labor earnings are given in Table 2.

Table 2 Impact of WEF 2021 on Jobs and Labor Earnings (Number of Jobs and Millions of Dollars)				
	Jobs Multipliers	Jobs Created	Earnings Multipliers	Labor Earnings
Stabling, Feed/Bedding & Manure Disposal	24.15	783	0.54	\$23.3
Training	30.92	570	0.61	\$14.9
Farrier/Shoeing, Supplements & Medication	18.38	168	0.40	\$4.8
Equipment Maintenance & Purchase	16.70	119	0.45	\$4.3
Local Horse Paid Transportation	9.89	40	0.35	\$1.9
Vehicle Fuel, Parts & Repair	14.60	49	0.52	\$2.4
Other Horse Expenditure	36.01	587	0.51	\$16.2
Total	23.81	2,315	0.52	\$67.7

The direct horse expenditures of \$132.6 million at the 2021 WEF created 2,315 jobs in all industries. These include industries providing supplies to the 2021 WEF participants and consumer industries serving the needs of workers in the various supply chains which received increases in their labor earnings. The total increase in labor earnings was \$67.7 million. (The average earnings per job was \$29,242).

V. Tourist Expenditures by Out of County 2021 WEF Participants

This section of the report contains estimates of the “tourist” expenditures made by out of county participants who visited WEF 2021. Tourist expenditures include spending on lodging, dining and groceries, entertainment and recreation, shopping and local transportation.⁴ Data on these expenditures was collected in the email survey discussed in previous sections of this report.

Tourist Characteristics

People visiting an area away from home usually travel in parties. A party is a group of individuals traveling together who share expenses. As a result, the unit of observation for a visitor survey is the traveling party. Such parties have two characteristics that strongly influence their expenditures: their party size, namely, the number of persons in their party, and their length of stay, which is the number of days (or nights) that the members stay at a particular location.

2021 WEF participants had an average party size of 2.7 persons and an average length of stay of 66 nights. The party size is similar to other surveys of Palm Beach County tourists, but WEF participants tend to have a longer stay than many other tourists. The length of stay is long because the event that draws WEF participants lasts 12 weeks. (13 weeks in 2021).⁵

Average Tourist Expenditures

The average tourist expenditures per party was \$20,208. Lodging was the largest item accounting for 43.1 percent of the total, followed by dining and groceries which together accounted for 27.4 percent. Shopping accounted for 8.5 percent, entertainment and recreation, and local transportation, and a residual other category each accounted for 7 percent.

Most WEF Participants reported that they stayed in single family homes (60 percent) or apartments/condominiums (26.7 percent). A smaller group stayed in hotels or motels (11.3 percent) and only 2.0 percent stayed in Mobile Homes or RVs. We have observed in surveys of beach tourists in South

Florida that hotels are chosen for lodging by short term visitors, condominiums are chosen by longer term visitors who have small party sizes, and that single family homes are chosen by longer term visitors with larger party sizes.

Average lodging expenditure per person per night amounted to \$77.81.⁶ The average number of bedrooms rented per party was 2.2 (for an average party size of 2.7 persons). Most persons stayed in their own bedroom (in either a single family home or a condominium). Spending per room was relatively low in part because many owned their place of lodging, or they were staying with friends or relatives.

Total Tourist Expenditures

Total visitor expenditures were obtained by multiplying average expenditures by type, by the estimated number of out of county visitor parties (as obtained from the email survey). The result was total expenditures by visitors to WEF 2021 of \$35.6 million, an increase of about 6 percent over the WEF 2020 estimate. This reflected in part, the longer duration of the WEF 21.

Direct and Indirect Expenditures

Economists refer to the total tourist expenditures estimated above as “direct” expenditures because they are made by the tourists to the industries they affect directly. Direct tourist expenditures result in indirect expenditures. These are the additional expenditures made by businesses in the local supply chains that supply the various inputs to the front line industries that provide the goods and services directly purchased by the WEF participants. There are also expenditures made by the workers who receive increased incomes because of the expansion of the supply chains. The spending by workers goes on consumer goods and services such as lodging, food, educational, medical, and transportation services and so on. The direct expenditures by spending category are presented in Table 3.

Table 3
The Expansion of Palm Beach County GDP due to the Tourist Expenditures of WEF 2021 Participants.
(Millions of Dollars)

	Direct Expenditures	Indirect Expenditures	Total Expenditures
Lodging	\$15.6	\$8.9	\$24.5
Dining	\$5.2	\$3.3	\$8.6
Groceries	\$4.6	\$3.2	\$7.7
Entertainment & Recreation	\$2.4	\$1.6	\$4.0
Shopping	\$3.0	\$2.1	\$5.2
Local Transport.	\$2.3	\$4.7	\$13.8
Other Visitor Expenditures	\$2.6	\$1.8	\$4.4
Total	\$35.6	\$22.1	\$57.8

The total of the direct and indirect effect expenditures is the impact of WEF participant tourist expenditures on the production of the Palm Beach County economy (GDP). Participant tourist expenditures increased the GDP of Palm Beach County by \$57.8 million, the sum of direct and indirect spending. Each dollar of direct visitor expenditure resulted in \$1.62 so the overall multiplier was 1.62.

The “multipliers” that convert direct expenditures by type into total expenditures by type were obtained from a special run of the RIMS II Model of Palm Beach County obtained from the Bureau of Economic Analysis (BEA) of the US Department of Commerce. The BEA produces the official GDP estimates for the US nation, the states, and counties as well as RIMS II models for the various regions of the national economy.

Jobs Created and Labor Earnings

As the Palm Beach GDP expands due to the spending by visitors to the 2021 WEF, jobs are created for Palm Beach County workers and their labor earnings are increased. The RIMS II Model also produces estimates of the number of jobs created as well as the increase in earnings. These are shown in Table 4.

<p style="text-align: center;">Table 4 Impact of Direct Visitor Expenditures on Jobs and Labor Earnings Number of Jobs and Millions of Dollars</p>				
	Jobs Multipliers	Jobs Created	Earnings Multipliers	Labor Earnings
Lodging	15.0502	217	0.4431	\$6.9
Dining	25.4649	123	0.4802	\$2.5
Groceries	16.7956	71	0.4716	\$2.1
Entertainment & Recreation	20.7879	45	0.5189	\$1.2
Shopping	16.7956	47	0.4716	\$1.4
Local Transportation	9.9671	21	0.3496	\$0.8
Other Visitor Expenditures	16.7956	40	0.4716	\$1.2
Total	15.7064	565	0.4312	\$16.2

The expenditures of visitors to the 2021 WEF created 565 jobs in all industries impacted by the direct spending of WEF visitors, including supplying industries and consumer industries serving the needs of workers in the various supply chains which received increases in their labor earnings. The total increase in labor earnings was \$16.2 million. The average earnings per job was \$28,673.

Paid Room Nights Occupied by 2021 WEF Non-Resident Participants

Spending by 2021 WEF Visitors had a positive impact on the paid room nights at Palm Beach County lodging places. They generated 149,894 paid room nights. This estimate reflects the absence of attendees at WEF 2021, but also the increased duration of the event.

VI. Total Economic Impact of 2021 WEF

The economic impact of the Winter Equestrian Festival (WEF) is caused by the “direct” spending pumped into the local economy because of WEF. There are two types of direct expenditures generated by the WEF, namely, horse expenditures made by all participants and tourist expenditures made by nonresident participants by non-participating visitors.

The 2021 WEF caused an increase in the GDP of Palm Beach County of \$278.9 million, resulting in the creation of 2,880 jobs throughout the economy and labor earnings of \$83.9 million. About 80 percent of the impact was due to horse expenditures and 20 percent was due to visitor expenditures. Visitor expenditures were lower than might be expected in a more normal year because the coronavirus pandemic led to the early cancellation of the WEF. The impact of the pandemic on horse expenditures was less significant because many horses remained on site during the cancellation period because of travel restrictions and the lack of competing events.

Table 5 Economic Impact of the 2021 WEF on the Palm Beach County Economy Millions of Dollars			
	Direct Expenditure	Total Expenditures (GDP)	Percent of Total
Horse expenditures	\$132.6	\$221.1	79.3
Nonresident tourist expenditures	\$35.6	\$57.8	20.7
Total	\$168.2	\$278.9	100.0

The WEF 21 direct expenditures Jobs created 2,880 jobs in the economy throughout the economy included those created by direct spending, plus those created as supply chains expanded, and consumer industries expanded as workers received additional labor earnings of \$83.9 million (See Table 6). The jobs that were created earned on average, \$29,131 per job.

Table 6 Impact of the WEF on Jobs and Labor Earnings Millions of Dollars and Number of Jobs		
	Labor Earnings	Jobs
	Impact	Impact
Participant Horse Expenditures	\$67.7	2,315
Non-resident Visitor Expenditures	\$16.2	565
Total	\$83.9	2,880

WEF 2021 participants and visitors generated 149,894 paid room nights for the Palm Beach County lodging industry. This was 18 percent lower than in 2020. Part of the reason for the reduction was the absence of attendees at the events of the WEF221 which was closed to the public because of the COVID 19 pandemic.

¹ A mail survey, even when conducted on the internet, has a lower response rate than a telephone survey unless the latter survey reports the number of calls made that were not completed. It is also lower than a personal interview survey unless the number of persons approached by the interviewers who refuse to participate is reported. Our experience suggests that 20 percent is a minimum response rate for a mail survey provided a minimum of 400 completed surveys are returned. The response rate and number of completed responses to the internet survey were sufficient to ensure satisfactory accuracy of the results.

² As noted in endnote 4 below, we capped the length of stay at 14 weeks.

³ The other category included entry fees.

⁴ These items are normally included in tourist surveys.

⁵ WEF usually lasts 12 weeks but in 2020 it was canceled one week early because of COVID 19 and WEF 2021 lasted 13 weeks, one week longer than normal to compensate participants for the early closure in the preceding year. Although some participants stayed less than 13 weeks, there were also some participants who stayed considerably longer. We capped the length of stay at 14 weeks, namely, the duration of the WEF (13 weeks) and an extra week to allow participants to arrive a few days earlier than WEF and/or stay a few days later. Some participants come even earlier to attend other events, or to enjoy their horses before WEF begins. They behave like seasonal residents attracted to the county because of the warm weather and friends whom they have met on previous visits. Like many seasonal residents, some participants have purchased condominiums or single family homes in the county.

⁶ About one in four visitors did not pay for their lodging (26.7 percent).

2021 Final Millage Rates

	Taxing Authority	2021 Final Millage Rate	2021 Proposed Millage Rate	Proposed vs Final Millage Rate

Wellington Presents Preliminary 2023 Annual Budget

The Village of Wellington is preparing the Fiscal Year 2022/2023 Budget process based on the development, implementation, and evaluation of plans for the provision of services and capital assets. The first phase of the budget process is presenting the overall Village budget. The second phase, departmental budgets, will follow in a few weeks.

Highlights

- The total preliminary FY 2023 budget is \$128.5 million as compared to the FY 2022 budget of \$134 million, including inter-fund transfers. The \$5.5 million decrease is primarily due to capital improvement projects.
- The Fiscal Year 2023 proposed budget continues Wellington’s standard of providing high service levels and maintaining infrastructure. The proposed budget addresses capital projects while maintaining the same millage and ACME assessment rates.

Preliminary Rates Compared to FY 2022

FY 2022/2023 RATES	Adopted FY 2022	Proposed FY 2023	Change	%
Millage	2.47 mills	2.47 mills	0.00	0.0%
Ad Valorem Revenues	\$21,821,983	\$24,422,460	\$2,600,477	11.9%
Acme Improvement District	\$230	\$230	\$0	0.0%
Solid Waste Curbside/Containerized	\$171/121	\$220/170	\$49/\$49	28.7% 40.5%
Water Base Rate	\$21.43	\$22.18	\$0.75	3.5%
Per 1,000 gal usage	\$2.42 - 7.95	\$2.50 - 8.23	\$0.08 - \$0.26	3.5%
Wastewater Base Rate	\$20.44	\$21.15	\$0.71	3.5%
Per 1,000 gal usage	\$2.25	\$2.33	\$0.08	3.6%

(1) Based on an certified taxable value of \$10.4 billion from PBC property appraiser 6.28.22

- With an estimated 12.7% increase in the 2022 Taxable Value to \$10.4 billion, the strength of Wellington’s residential market provides ad valorem tax revenues of \$2.6 million more than last year at the preliminary 2.47 millage rate. The revenue value of each .1 mill is \$989,000 in FY 2022 compared to \$883,000 in FY 2022.
- The ad valorem impact for a homesteaded property valued at \$400,000 is an increase of about \$33 with a 3% assessed value increase. The increase is \$111 for a non-homesteaded property with a 10% assessed value increase.
- Besides increased ad valorem revenues, revenue increases are included in permits/fees which are driven by activity in the Building Department. The Village is including the addition of the SHIP program and there are increased revenues in charges for services driven by strong parks & recreation programs.
- The preliminary FY 2023 budget funds 244 full-time governmental positions, 90,669 part-time hours, 4 supplemental positions, and 2 interns. In the enterprise funds, the budget funds 66 full-time positions, and 9 supplemental positions. and 1 intern.
- Capital and Major Maintenance Projects included in the preliminary 2023 Budget include:

One Time Projects

Public Safety Annex	\$3,000,000
WCC Improvements	\$ 100,000
GVS Bike Lanes (Grant Match)	\$ 250,000
Section 24 Preserve (Grant Match)	\$ 500,000
Olympia Park Courts (1 of 2 yrs)	\$ 600,000
Community Park Renovations	\$1,500,000
Aquatics Complex Replacement	\$3,415,024

Ongoing Programs

Acme R & R	\$ 795,000
Neighborhood Parks	\$ 320,000
Neighborhood Pipe Lining	\$ 510,000
Park Improvements	\$ 325,000
Tech. Investment	\$ 300,000
Multiuse Pathways	\$ 380,000
Traffic Engineering	\$ 75,000
Athletic Fields	\$1,200,000
Streetscape	\$ 510,000
Turn Lanes	\$ 120,000

Utilities

Communications & Tech Investment	\$ 60,000
Water Supply Improvements	\$ 500,000
Water Treatment System	\$4 000,000
Water Repump and Storage	\$ 200,000
Force Main Wastewater System	\$1,000,000
Water Reclamation Facility	\$3,550,000
Reuse System Improvements	\$ 350,000

A sign of Wellington's growth: Publix plans makeovers, expansions of 2 supermarkets in village

One will improve a store that opened in 1991. The other will turn the local Fresh Market into a Publix, according to plans before the village.

Valentina Palm

Palm Beach Post

[View Comments](#)

WELLINGTON — A third Publix Super Market will open in the village by 2024 and the existing store at the Courtyard Shops shopping center will be demolished and then rebuilt into an expanded, modern store, Wellington records show.

Both stores will feature new prototype designs with wider aisles and a new color palette that will match renovations made to the store at The Crossings shopping plaza in Royal Palm Beach.

Rebecca Miller, president of Miller Permitting & Land Development overseeing the opening of the new store, said Wellington's growth is driving the supermarket chain's investment in the area.

Wellington's population has risen by about 17% since 2010, to 66,700 residents in 2020 from about 56,800, according to census data. Much of that growth came among households with children.

"Currently, the population of Wellington is expanding a lot," Miller said.

The village's Architectural Review Board approved the designs for both stores last month . Both projects need to complete their architectural plans and apply for building and engineering permits before developers break ground on the projects.

The Publix at the Courtyard Shops will remain open until December and will be closed for several months starting January 2023. The store at the Town Square at Wellington shopping center at Forrest Hill and South Shore boulevards will be open.

New Publix store to replace Fresh Market, add 17,000 square feet, new features

The new Publix store will replace the Fresh Market near The Mall at Wellington Green on Forest Hill Boulevard. The 21,397-square-foot building hasn't been renovated since it opened in 2006.

According to building plans, the supermarket and two adjacent stores will be demolished to erect a single new supermarket. Tearing down the two other stores will allow 17,000 square feet to be added to the sides and rear, creating a 38,539-square-foot store.

Miller expects the demolition to start in December when the leases of the Fresh Market and neighboring tenants expire.

"We'll be on a very aggressive plan," said Miller, who projects the store will open during the first months of 2024.

The store will feature higher ceilings, an open floor plan that removes its current column-driven design and an updated color scheme of white and shades of earthy browns, faint yellows, light green and blue. The sign will also be 20 inches higher.

The opening of a Publix store so close to the mall is driven by the new development of senior housing nearby and the city's growing population, Miller said.

"It's going to drive a lot of additional traffic to the adjacent stores and shops that will benefit hugely and also drive more opportunity for others there," Miller said.

Publix at Courtyard shopping center to be demolished, renovated

The Publix at the Courtyard Shops will undergo a complete makeover. The store, at Greenview Shores Boulevard and Wellington Trace, and two adjacent tenants will be demolished and replaced with a 59,000-square-foot store and a 2,100-square-foot Publix Liquors next door.

The Courtyard Shops shopping center was built in 1991 and was renovated only once, in 2009. Store renderings detail the construction of a building to “transform the outdated building into an attractive and vibrant shopping center.”

New features will include a window-covered facade with brick columns and the same color palette proposed for the Publix at The Mall at Wellington Green. Two new green signature Publix signs will be added to the storefront, one for the main entrance to the supermarket and pharmacy, and a smaller version for the liquor store.

The village’s Architecture Board approved the renovation but issued 12 conditions to ensure project materials, guidelines and finish are consistent with the ones presented to the board.

The store makeovers aren't the only investments that Publix Super Markets has been making in Palm Beach County's western communities.

The Lakeland-based company also recently purchased for \$56.5 million the River Bridge Centre, a Greenacres shopping plaza near on Forest Hill Boulevard and Jog Road where it operates a store.

Lennar to finish buildout after \$190 million land buy at new Arden community near Wellington

Kimberly Miller

Palm Beach Post

A staggering \$190 million bulk purchase of hundreds of individual lots and as-yet undivided land at the new Arden development near Wellington deepens the investment by mega-homebuilder Lennar in the outdoor lifestyle and farm-themed community.

The deal, which was finalized April 7, means land at the planned development is sold out and Lennar will finish construction on what will be a 2,300-home neighborhood about 20 miles inland from Palm Beach County's coast off Southern Boulevard.

A deed filed last week in official records lists the buyer as a limited liability company but Lennar spokeswoman Danielle Tocco said the company was "involved" in the purchase.

Boston-based Freehold Communities dubbed its Arden development an "agrihood." At 1,200-acres, the former sod farm advertises 20 miles of trails, 175 acres of lakes and a

working farm that provides residents with fresh produce. The community is just east of Palm Beach Aggregates and west of Lion Country Safari.

In March, Lennar Homes LLC bought more than 50 individual Arden lots for \$7.4 million.

The builder already has homes under construction at the master-planned community. Five models of homes with prices ranging from about \$481,000 to \$941,000 are listed on Lennar's Arden website. A new "Twin Homes" collection was unveiled in February. The three-bedroom, two-bathroom duplexes have about 2,000 square feet and start at \$480,990.

"Lennar has been part of Arden since inception and understands the vision of this unique community," said Thomas Tischer Jr., a co-founder of Freehold Communities in a statement. "It has been a pleasure to work alongside the Lennar team for years as they built quality homes for hundreds of Arden families."

The \$190 million sale this month was to AG EHC II LEN Multistate 2 with an address in care of Essential Housing Asset Management in Scottsdale, Ariz. An SEC filing from October 2020 reflects a land-banking agreement between Lennar and AG Essential Housing Company to buy and develop properties. AG Essential Housing Company has the same Arizona address as Essential Housing Asset Management.

Jeremy Olsher, a Realtor with Compass' Mizner Residential Group, said he's not surprised by the bulk purchase considering the high demand for new homes.

"It takes two years to build a home, and people who locked in at prices two years ago are seeing a big appreciation already," Olsher said. "If you have a property just built, furnished and ready to move into, you can ask a ridiculous price and people will pay a huge premium on it because they've missed out on everything else."

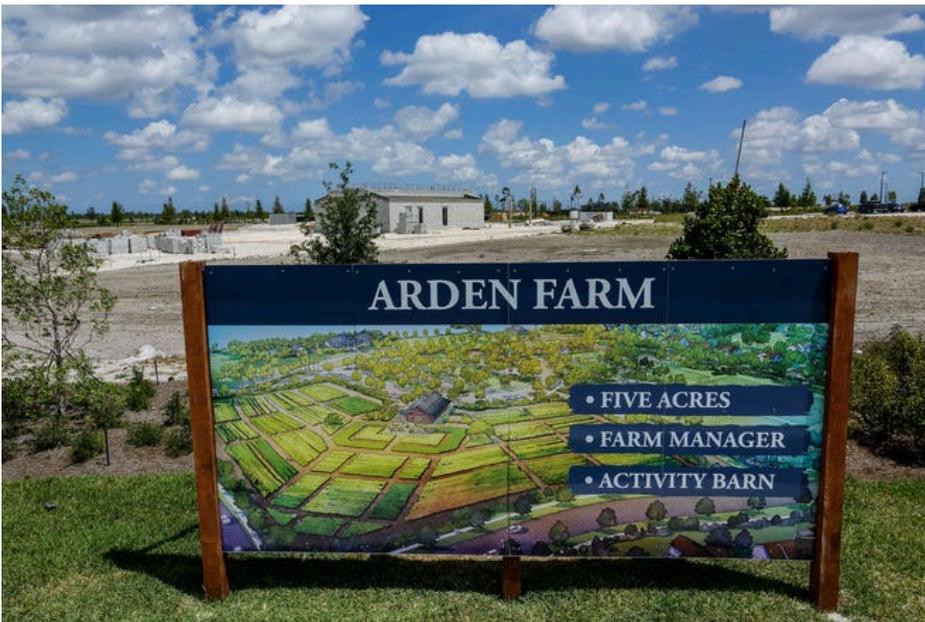

Olsher said his team was told at a recent sales meeting to expect another 15% appreciation in single-family homes over the next year.

A pandemic-triggered growth spurt in South Florida, a lack of housing inventory and supply-chain stresses means developers are scrambling to meet the demand for new homes.

In January, a Lennar affiliate paid \$19.9 million for the former Villa Del Ray Golf Course west of Delray Beach. The 118.6-acre property is approved for 415 homes for residents age 55-plus.

Lennar Palm Atlantic Division President Michael Meyers said Arden is an important addition to help meet homebuyer demand.

"Arden perfectly fits the Florida lifestyle that appeals to so many people, and we are delighted to complete a community we've been a part of since the beginning," Meyers said in a statement.

Olsher said homebuyers looking for new construction are often competing with investors who want quick returns.

"They buy it and hold it for a year, then reap the benefits," Olsher said.

New homes are so sought after that GL Homes held a lottery in March for properties at its Valencia Grand development on Lyons Road. Homebuyers paid a refundable \$10,000 in the hope they'd be chosen at random to buy in the 55-plus community. There were 75 lots available for 190 participants. Prices in Valencia Grand start at around \$930,000.

GL Homes and Kenco Communities also have homes in Arden, but Kenco's website says its Arden inventory is sold out. Kenco is directing buyers to its homes at [Avenir in Palm Beach Gardens](#).

Lotis in Wellington: Project would bring restaurants, retail, senior living to 64 acres

Kristina Webb

kwebb@pbpost.com

WELLINGTON —A developer hopes to turn 64 acres just north of Wellington Regional Medical Center into retail, restaurants, offices, multifamily homes and senior living.

JKM Developers paid \$14.25 million for the property in January, and recently submitted applications to Wellington to formally begin the approval process for the project now known as Lotis, said Planning, Zoning and Building Director Bob Basehart.

The property extends west from State Road 7 and is north of the medical office buildings that sit just north of Wellington Regional. It includes a 24-acre lake. The land has mostly been cleared by the operations of the previous owner, who used the site as a sand mine.

According to the applications, JKM wants to build 12,000 square feet of restaurant space, 43,000 square feet of retail space, a 62,000-square-foot medical office building, 255 multifamily units, a 67-unit independent living facility and a 100-bed assisted-living facility.

"Our corporate philosophy is to concentrate on good locations that offer a range of amenities," JKM partner Jim Giolda said. The company looks for sites for senior living "that already have strong amenities built in," he said.

The Boca Raton-based company has had its eye on the land for about 10 years, he said.

The project would help meet a growing need for senior housing in South Florida, Giolda said.

"We're starting to get that gray tide of Baby Boomers," he said.

JKM would need to dedicate part of its land for civic use, per Wellington's rules for mixed-use projects. Giolda said the property would be a great location for a senior, entertainment or arts center on the 2 acres JKM plans to hand over to Wellington.

To make the large-scale project a reality, the new property owners need to get zoning and comprehensive plan amendments for about 10 acres that were added by the previous property owner, but where the uses were never changed to match the rest of the land, Basehart said.

JKM also needs to get approval of its master plan and site plan, Basehart said. It could be several months before the applications begin the public hearing process.

This isn't the first time a multi-million dollar project has been pitched for the site.

In 2015, then-property owner Roger Fina submitted plans to Wellington for Village Lake Center, with 420 apartments, retail, restaurants, an assisted-living facility, and daycare or office space.

Before that, a medical arts hub was proposed there in 2010.
