To Whom It May Concern:

This letter serves as a letter of reference regarding the work and performance of Southeast Drilling Services, Inc. on the project referenced above, where Cardno was the Engineer of Record and Southeast Drilling Services, Inc. was the Drilling Contractor of Record.

The project included all work related to the construction and testing of a 1,850-foot deep Class 1 Injection Well (IW-1) and associated 1,550-foot deep Dual Zone Monitor Well (DZMW). The injection well currently serves as a source for seawater quality raw water required for Algenol's ethanol producing bioreactors, and also as a disposal mechanism to return leftover water generated in bioreactors to the source aquifer. The dual-zone monitoring well is utilized to monitor potential upward migration of the disposed seawater-quality fluids.

Work elements included three packer tests at selected borehole intervals, numerous geophysical logging and video surveys, radioactive tracer survey and hydrostatic pressure testing of the casings, an injection test, inclination surveys, and installation of above-ground instrumentation and control panels, pumps, and wellhead. The project was completed in April, 2013. The total project cost was approximately \$2.0 million dollars.

Southeast Drilling Services' workmanship, professionalism, commitment, and dedication to the project resulted in the successful completion of the project.

Should you have any questions or comments regarding this letter, please feel free to contact me.
