LANDSCAPE MAINTENANCE STANDARDS & SPECIFICATIONS

1. Line Trimming, Edging and Weed Control

- Line trimming to be done with each mowing around all fixed objects exposed in the turf, including irrigation devices, trees, signs, posts, poles, water bodies and other fixtures commonly found in such settings, and along all fences. Line trimming must be performed to a uniform height equal to the mowed area.
- Grass clippings may remain on-site but must be either mulched or raked so as not to leave evidence of visible clumping.
- All grass clippings and other vegetative trimmings shall be blown from the streets, sidewalks, parking areas, brick pavers and other decorative features or areas on days when maintenance is performed.
- All curb and road edges, sidewalks, brick pavers, bordering materials, planters and tree wells shall be machine edged with each mowing, unless directed otherwise by Client.
- Tree wells shall be maintained around each tree in a uniform circle and free from undesirable vegetation.
- Tree wells and ornamental planter beds shall be maintained free of weeds or other undesirable vegetation through manual harvest or herbicide application methods. All crack or crevice vegetation shall be removed as required from brick pavers, sidewalks and other pavement surfaces. Any herbicides applied for the control of nuisance vegetation must be approved for use in the State of Florida by the Department of Environmental Protection and must be used in accordance with the manufacturers' directions.

2. Debris Removal

- All debris generated as a result of landscape maintenance activities shall be removed and disposed of at Contractor's expense.
